The Dark Forest Cixin Liu, 2015-08-11 Time is running out for humanity in The Dark Forest the stunning sequel to Cixin Liu s award winning and bestselling masterpiece The Three Body Problem Earth is still reeling from the revelation of a coming alien invasion The aliens human collaborators may have been defeated but the presence of the sophons the subatomic particles that allow

Trisolaris instant access to all human information means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four people enormous resources to design secret strategies hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown: Luo Ji, an unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead.

The Dark Forest continues Cixin Liu's ground-breaking saga of incredible scope and vision: *The War of the Worlds for the twenty-first century*. Packed with a sense of wonder, *The Wall Street Journal* calls it "A meditation on technology, progress, morality, extinction, and knowledge that doubles as a cosmic balance thriller." NPR: *The Remembrance of Earth's Past Trilogy: The Three-Body Problem: The Dark Forest: Death's End*. Other books: *Ball Lightning* (forthcoming) **Prophets of Computing** by Dick van Lente, 2022-12-14. When electronic digital computers first appeared after World War II, they appeared as a revolutionary force. Business, management, the world of work, administrative life, the nation-state, and soon enough, everyday life were expected to change dramatically with these machines' use. Ever since, diverse prophecies of computing have continually emerged through to the present day. As computing spread beyond the US and UK, such prophecies emerged from strikingly different economic, political, and cultural conditions. This volume explores how these expectations differed, assesses unexpected commonalities, and suggests ways to understand the divergences and convergences. This book examines thirteen countries based on source material in ten different languages, the effort of an international team of scholars. In addition to analyses of debates, political changes, and popular speculations, we also show a wide range of pictorial representations of the future with computers.

Death's End by Cixin Liu, 2016-09-20. The inspiration for the Netflix series *3 Body Problem*. Over 1 million copies of the *Three-Body Problem* series sold in North America. PRAISE FOR THE THREE BODY PROBLEM SERIES: A mind-bending epic. *The New York Times*. *The War of the Worlds for the 21st century*. *The Wall Street Journal*. Fascinating. *TIME*. Extraordinary. *The New Yorker*. Wildly imaginative. Barack Obama. Provocative. *Slate*. A breakthrough book. George R. R. Martin. Impossible to put down. *GQ*. Absolutely mind-unfolding. NPR. You should be reading Liu Cixin. *The Washington Post*. *The New York Times* bestselling conclusion to the groundbreaking Hugo Award-winning series from China's most beloved science-fiction author, Cixin Liu. Half a century after the Doomsday Battle, the uneasy balance of Dark Forest Deterrence keeps the Trisolaran invaders at bay. Earth enjoys unprecedented prosperity due to the infusion of Trisolaran knowledge. With human science advancing daily and the Trisolarans adopting Earth culture, it seems that the two civilizations will soon be able to co-exist peacefully as equals without the terrible threat of mutually assured annihilation. But the peace has also made humanity complacent. Cheng Xin, an aerospace engineer from the early twenty-first century, awakens from hibernation in this new age. She brings with her knowledge of a long-forgotten program dating from the beginning of the Trisolar Crisis, and her very presence may upset the delicate balance between two worlds. Will humanity reach for the stars or die in its cradle? *The Three*

Entanglements and Ambivalences Hongwei Bao, Daniel H. Mutibwa, 2025-02-18 This book explores the media and cultural exchanges between Africa and China in the twenty-first century against the backdrop of the rise of Africa and China in global geopolitics. It situates these cultural encounters in historical and contemporary contexts and through the critical lens of the Global South. It identifies a rising Global South consciousness despite lingering historical entanglements and emotional ambivalences that continue to characterise Africa-China relations. Bringing together scholars from various disciplines and from different parts of the world, this book examines a wide range of cultural expressions such as arts, literature, translated works, traditional and digital media artefacts and services, and film festivals. It also interrogates emerging cultural interactions, experiences and practices engendered by the increasingly digitalised information and communication technology infrastructure underpinning Africa-China connections and links. In doing so, the book contributes to a more nuanced understanding of Africa-China relations today and the concept of the Global South.

Global Science Fiction Gary Westfahl, 2025-06-09 Science fiction represents a diverse community of writers and readers that spans the entire world. This collection provides a global tour of the genre with essays about Latin American, European, African, Arabic, Indian, Japanese, and Chinese science fiction, providing insights about how writers around the world have explored and reinvigorated the genre. Essays by prominent critics from five continents inform about particular cultures and analyze representative texts by authors such as Tobias S. Buckell, Lourenço Mutarelli, Stanislaw Lem, Masande Ntshanga, Tawfiq Al Hakim, Anil Menon, and Cixin Liu. The contributing scholars examine how national experiences have shaped these narratives, which often differ strikingly from Anglo-American science fiction. An introductory survey of foreign language science fiction in the United States endeavors to explain why so many of these texts have remained unknown to Anglophone readers. An extensive bibliography lists numerous resources for further study of science fiction from various parts of the world.

Doom Niall Ferguson, 2021-05-04 All disasters are in some sense man-made. Setting the annus horribilis of 2020 in historical perspective, Niall Ferguson explains why we are getting worse, not better, at handling disasters. Disasters are inherently hard to predict. Pandemics like earthquakes, wildfires, financial crises, and wars are not normally distributed; there is no cycle of history to help us anticipate the next catastrophe. But when disaster strikes, we ought to be better prepared than the Romans were when Vesuvius erupted or medieval Italians when the Black Death struck. We have science on our side; after all, yet in 2020, the responses of many developed countries, including the United States, to a new virus from China were badly bungled. Why? Why did only a few Asian countries learn the right lessons from SARS and MERS? While populist leaders certainly performed poorly in the face of the COVID-19 pandemic, Niall Ferguson argues that more profound pathologies were at work—pathologies already visible in our responses to earlier disasters. In books going back

nearly twenty years including *Colossus* *The Great Degeneration* and *The Square and the Tower* Ferguson has studied the foibles of modern America from imperial hubris to bureaucratic sclerosis and online fragmentation Drawing from multiple disciplines including economics cliodynamics and network science *Doom* offers not just a history but a general theory of disasters showing why our ever more bureaucratic and complex systems are getting worse at handling them *Doom* is the lesson of history that this country indeed the West as a whole urgently needs to learn if we want to handle the next crisis better and to avoid the ultimate doom of irreversible decline
