## **Blended Finance Oecd:**

Making Blended Finance Work for the Sustainable Development Goals OECD,2018-01-29 The global community has spoken loud and clear more resources must be mobilised to end extreme poverty and mitigate the effects of climate change Blended finance is emerging as an important solution to help raise resources in support of the Sustainable Development Goals in developing countries *The OECD DAC Blended Finance Guidance* ,2021 Delivering the 2030 Agenda and the Paris Agreement will require all sources of finance public and private to be scaled up and aligned with sustainable development Blended finance can play an essential role in unlocking and channelling commercial finance towards sustainable development in developing countries However it remains a relatively new tool in development co operation While many donors have well established blended finance programs others are just now starting to deploy blended finance The OECD DAC Blended Finance Guidance is a policy tool to help all providers of development finance donor governments and agencies multilateral donors philanthropies and other stakeholders to put the Blended Finance Principles into practice and effectively design and implement blended finance programs Approved by the DAC in September 2020 the Guidance outlines policy recommendations and provides good practice examples as well as practical checklists and key references on blended finance The Guidance is the result of an extensive multi stakeholder consultation process involving international experts practitioners and researchers The Guidance ultimately aims to enhance the growth and improve the quality of finance that is mobilised and invested in sustainable development in developing countries *OECD DAC Blended Finance Guidance 2025* Oecd,2025-09-22 Since the first edition of the Blended Finance Guidance in 2020 the blended finance industry has experienced significant growth and evolution Blending is no longer an innovative approach it is a well known and widely used method for providers of development finance and the private sector to work together and leverage each other s resources and knowledge Yet it still faces important challenges Blended finance has not scaled as rapidly as hoped and has mobilised relatively limited private finance It has remained a cottage industry with largely bespoke and fragmented interventions as well as lack of standardisation and transparency This updated edition of the OECD DAC Blended Finance Guidance reflects on these challenges and on how the field has changed It offers strategic advice as well as practical insights for both policymakers and practitioners who want to use blended finance more effectively The Guidance is based on lessons learned and feedback from many stakeholders It highlights the importance of working together building trust through transparency and improving the conditions for investment in developing countries The Guidance is underpinned by case studies within a range of thematic areas that are critical for blended finance to work more effectively [OECD Blended Finance Guidance for Clean Energy](#) ,2022 Meeting the Paris Agreement goals will need a rapid acceleration of finance towards clean energy investments in emerging and developing economies Blended finance is an important tool that can help mobilise commercial investment towards clean energy whilst preserving scarce public resources for wider climate and development objectives A

systematic approach to the deployment of blended finance that tailors instruments to the nature of underlying barriers to commercial investment minimises concessionality has a clear exit strategy and is co-ordinated within a wider ecosystem of support and enabling measures can help maximise its development impact and stimulate private sector development This paper explores specific features of clean energy projects and the wider transition to draw lessons for donors policymakers in beneficiary governments and financial institutions on whether and how best to deploy blended finance in the sector It revisits the OECD DAC's Blended Finance Principles specifically Principle 2 designing blended finance to increase the mobilisation of commercial finance and explores their applicability to clean energy It also explores sector-specific considerations for the deployment of clean energy setting out the considerations development practitioners can make to inform better decision making on and maximise the development impact of blended finance interventions

Blended Finance in Fragile Contexts Irene Basile,2019 Abstract

The development community agrees on the need to address conflict and fragility for global security and sustainable development In such complex situations programming should strive to include multiple actors at various levels of society Although the use of private investment in fragile contexts has so far been low the need to address the SDG funding gap makes innovative and more flexible financing methods worth considering Official Development Aid remains critical but blended finance can help enlarge the total resources available for development This paper analyses the OECD DAC statistics on amounts mobilised from the private sector by official development finance interventions from 2012 to 2017 against the multidimensional lens presented in the OECD 2018 States of Fragility Framework The data shows a positive relationship between blending opportunities and economic political and environmental security The amounts of private finance mobilised increase as a country s economic political and environmental fragility decreases The way blended finance interplays with societal fragility and security remains unclear as these two dimensions exert more complex influence on the trade off between perceived risks and anticipated returns which typically guides private investors
