Heiner Bubb, Klaus Bengler, Rainer E. Grünen, Mark Vollrath, 2021-10-19 Ergonomics teaches how to design technology in
such a way that it is optimally adapted to the needs wishes and characteristics of the user In this context the concept of the
human machine system has become established In a systematic way and with a detailed view of the complicated technical
and perceptual psychological and methodological connections this book explains the basics of automotive ergonomics with
numerous examples The application is shown in examples such as package design of displays and control elements of
environmental ergonomics such as lighting sound vibrations climate and smell The design of driver assistance systems from
an ergonomic perspective is also a central topic The book is rounded off by methods of ergonomic vehicle development the
use of mock ups driving simulators and tests in real vehicles and prototypes For the first time those responsible in the
automotive industry and in the field of relevant research are provided with a specialized systematic work that provides the
ergonomic findings in the design of today s automobiles This provides planners and designers of today s automobiles with
concrete information for ergonomic product development enabling them to keep an eye on decisive requirements and
subsequent customer acceptance This book is a translation of the original German 1st edition *Automobilergonomie* by Heiner
