Akritas, 2004 *Nonparametric Statistics* Michele La Rocca, Brunero Liseo, Luigi Salmaso, 2020-11-11 Highlighting the latest advances in nonparametric and semiparametric statistics this book gathers selected peer reviewed contributions presented at the 4th Conference of the International Society for Nonparametric Statistics ISNPS held in Salerno Italy on June 11-15 2018 It covers theory methodology applications and computational aspects addressing topics such as nonparametric curve estimation regression smoothing models for time series and more generally dependent data varying coefficient models symmetry testing robust estimation and rank based methods for factorial design It also discusses nonparametric and permutation solutions for several different types of data including ordinal data spatial data survival data and the joint modeling of both longitudinal and time to event data permutation and resampling techniques and practical applications of nonparametric statistics The International Society for Nonparametric Statistics is a unique global organization and its international conferences are intended to foster the exchange of ideas and the latest advances and trends among researchers from around the world and to develop and disseminate nonparametric statistics knowledge The ISNPS 2018 conference in Salerno was organized with the support of the American Statistical Association the Institute of Mathematical Statistics the Bernoulli Society for Mathematical Statistics and Probability the Journal of Nonparametric Statistics and the University of Salerno *Special Issue: Papers Inspired by the Workshop 'Nonparametric Statistics: Refined, Redefined, and Renewed'* Edgar Brunner, 2010 *Nonparametric Statistics on Manifolds and Their Applications to Object Data Analysis* Victor Patrangenaru, Leif Ellingson, 2015-09-18 A New Way of Analyzing Object Data from a Nonparametric Viewpoint *Nonparametric Statistics on Manifolds and Their Applications to Object Data Analysis* provides one of the first thorough treatments of the theory and methodology for analyzing data on manifolds It also presents in depth applications to

practical problems arising in a variety of fields

All of Nonparametric Statistics Larry Wasserman, 2006-09-10 There are many books on various aspects of nonparametric inference such as density estimation nonparametric regression bootstrapping and wavelets methods But it is hard to find all these topics covered in one place The goal of this text is to provide readers with a single book where they can find a brief account of many of the modern topics in nonparametric inference The book is aimed at master's level or Ph D level statistics and computer science students It is also suitable for researchers in statistics machine learning and data mining who want to get up to speed quickly on modern nonparametric methods My goal is to quickly acquaint the reader with the basic concepts in many areas rather than tackling any one topic in great detail In the interest of covering a wide range of topics while keeping the book short I have opted to omit most proofs Bibliographic remarks point the reader to references that contain further details Of course I have had to choose topics to include and to omit the title notwithstanding For the most part I decided to omit topics that are too big to cover in one chapter For example I do not cover classification or nonparametric Bayesian inference The book developed from my lecture notes for a half semester 20 hours course populated mainly by master's level students For Ph D
