Gupta,2012-12-06 Uncertainty has been of concern to engineers managers and scientists for many centuries In management sciences there have existed definitions of uncertainty in a rather narrow sense since the beginning of this century In engineering and uncertainty has for a long time been considered as in sciences however synonymous with random stochastic statistic or probabilistic Only since the early sixties views on uncertainty have become more heterogeneous and more tools to model uncertainty than statistics have been proposed by several scientists The problem of modeling uncertainty adequately has become more important the more complex systems have become the faster the scientific and engineering world develops and the more important but also more difficult forecasting of future states of systems have become The first question one should probably ask is whether uncertainty is a phenomenon a feature of real world systems a state of mind or a label for a situation in which a human being wants to make statements about phenomena i e reality models and theories respectively One can also ask whether uncertainty is an objective fact or just a subjective impression which is closely related to individual persons Whether uncertainty is an objective feature of physical real systems seems to be a philosophical question This shall not be answered in this volume **Proceedings of the International Symposium on Engineering under Uncertainty:**

Safety Assessment and Management (ISEUSAM - 2012) Subrata Chakraborty,Gautam Bhattacharya,2013-03-12 International Symposium on Engineering under Uncertainty Safety Assessment and Management ISEUSAM 2012 is organized by Bengal Engineering and Science University India during the first week of January 2012 at Kolkata The primary aim of ISEUSAM 2012 is to provide a platform to facilitate the discussion for a better understanding and management of uncertainty and risk encompassing various aspects of safety and reliability of engineering systems The conference received
