The K to 12 Basic Education Curriculum: A Brief Introduction

Lesson 1 introduced us to a typical curriculum which is a reflection of what we hold dear as a people and as a nation, what we aspire for, and what drives us toward sustainability, peace, and economic stability.

Lesson 2 clarified our focus by defining the three key terms - curriculum, development, and system - that serve as centerpiece of discussions in this course.

Lesson 3 introduced us to various defining concepts attached to curriculum and curriculum development, systems, and processes.

New Horizons in Mathematics and Science Education, 2001 Elementary and Middle School Mathematics John A. Van de Walle, 1998. John A. Van de Walle has written a book that helps readers make sense of mathematics and become confident in their ability to teach mathematics to children K to 8. Elementary and Middle School Mathematics consists of 16 chapters reflecting the view that all mathematics can be taught through a problem solving approach that motivates children and builds their confidence as they learn. This book thoroughly discusses the new standards and clearly develops four key aspects of teaching mathematics: the nature of mathematics as a science of pattern and order; an understanding of how children learn mathematics; a problem solving view of teaching mathematics; and specific methods for integrating assessment with instruction. Simple yet effective classroom activities are woven throughout the chapters, as well as suggestions for technology and literature.
