Handbook for Teaching and Learning in Geography Helen Walkington, Jennifer Hill, Sarah Dyer, 2019-12-27 This exemplary Handbook provides readers with a novel synthesis of international research evidence based practice and personal reflections to offer an overview of the current state of knowledge in the field of teaching geography in higher education Chapters cover the three key transitions into through and out of higher education to present a thorough analysis of the topic

Innovating Education in Technology-Supported Environments Kam Cheong Li, Eva Yuen Mei Tsang, Billy Tak Ming Wong, 2020-09-29 This book explores a broad range of innovations in education such as flipped classrooms the educational use of social media mobile learning and educational resources It also includes theoretical discussions and practical applications related to the use of augmented reality and educational technologies for improving students engagement and facilitating their future studies and careers Featuring case studies and practical applications illustrating the effectiveness of new modes of education in which the latest technologies and innovations are widely used in the global context the book helps readers develop their awareness of the related insights and implications in order to deepen their understanding and stimulate critical thinking as to how new technologies have made learning and teaching easier in different educational settings

Radical Collegiality through Student Voice Roseanna Bourke, Judith Loveridge, 2018-08-17 This book celebrates the rights of the child through including student voice in educational matters that affect them directly It focuses on the experiences of children and young people and explores how our educational policies practices and research endeavours enable educators to help young people tell their own stories The respective chapters illustrate how listening to young people can help them attain new positions of power even though doing so often creates discomfort and requires a radical change on the part of the adult establishment Further the book challenges researchers teachers and practitioners to reconsider how students are involved in research and policy agendas and to what extent radical collegiality can create fundamental and positive changes in the lives of these learners In recent decades greater attention has been paid across policy practice and research discourses to involving children more meaningfully and actively in decisions about their participation in both formal and informal educational settings The book's goal is to illustrate how researchers have systematically involved students in the pursuit of a richer understanding of educational experiences policy and practice through the eyes and ears of young people and through their own cultural lens
