The Neuropsychological Evaluation

Diane B. Howieson, Ph.D.
Muriel D. Lezak, Ph.D.

These developments have allowed a shift in the

focus of neuropsychological assessment from the diagnosis of possible brain damage to a better understanding of specific brain-behavior relationships and of the psychosocial consequences of brain damage.

The more common brain disorders are cerebrovascular disorders, head injury, hydrocephalus, Alzheimer's disease, Parkinson's disease, multiple sclerosis, Huntington's chorea, tumors, seizures, and infections. A neuropsychological evaluation can be useful in defining the nature and severity of resulting functional problems. The assessment provides information about the patient's cognition, personality characteristics,
