Black Sheep and Prodigals Dave Tomlinson, 2017-04-20 Very interesting it's all about not alienating people before they even think about crossing the threshold of where you worship Chris Evans BBC Radio 2 Do you feel more at home on the edges of faith than at the centre Would you call yourself a bit of a black sheep Too often Christian spirituality has been associated with conformity or a subculture where people don't feel able to ask questions But Dave Tomlinson author of *How to be a bad Christian* doesn't think it has to be like this instead our spiritual communities can be laboratories of the Spirit places where we can explore issues of faith and spirit with openness imagination and creativity Welcome to black sheep spirituality where doubts and questions are an essential part of faith where difference of opinion is a sign of a secure community where divine revelation is embraced wherever it is found in the arts science and the natural world as well as religious tradition and where faith is something that is lived and practised rather than embalmed in beliefs or ritual Theology for anyone and everyone BBC Radio 2

The Weirdness of the World Eric Schwitzgebel, 2024-01-16 How all philosophical explanations of human consciousness and the fundamental structure of the cosmos are bizarre and why that's a good thing Do we live inside a simulated reality or a pocket universe embedded in a larger structure about which we know virtually nothing Is consciousness a purely physical matter or might it require something extra something nonphysical According to the philosopher Eric Schwitzgebel it's hard to say In *The Weirdness of the World* Schwitzgebel argues that the answers to these and other fundamental questions about the world and our existence lie beyond our powers of comprehension We can be certain only that the truth whatever it is is weird Philosophy he proposes can aim to open to reveal possibilities we had not previously appreciated or to close to narrow down to the one correct theory of the phenomenon in question Schwitzgebel argues for a philosophy that opens According to Schwitzgebel's *Universal Bizarreness* thesis every possible theory of the relation of mind and cosmos defies common sense According to his complementary *Universal Dubiety* thesis no general theory of the relationship between mind and cosmos compels rational belief Might the United States be a conscious organism a conscious group mind with approximately the intelligence of a rabbit Might virtually every action we perform cause virtually every possible type of future event echoing down through the infinite future of an infinite universe What if anything is it like to be a garden snail Schwitzgebel makes a persuasive case for the thrill of considering the most bizarre philosophical possibilities
