Computational Social Science Wei Luo, Maria Ciurea, Santosh Kumar, 2021-02-18

Selected papers from the International Conference on New Computational Social Science focusing on the following five aspects

- Big data acquisition and analysis
- Integration of qualitative research and quantitative research
- Sociological Internet experiment research
- Application of ABM simulation method in Sociology Research
- Research and development of new social computing tools

With the rapid development of information technology especially sweeping progress in the Internet of things cloud computing social networks social media and big data social computing as a data intensive science is an emerging field that leverages the capacity to collect and analyze data with an unprecedented breadth depth and scale It represents a new computing paradigm and an interdisciplinary field of research and application A broad comprehension of major topics involved in social computing is important for both scholars and practitioners This proceedings presents and discusses key concepts and analyzes the state of the art of the field The conference not only gave insights on social computing but also affords conduit for future research in the field Social computing has two distinct trends One is on the social science issues such as computational social science computational sociology social network analysis etc The other is on the use of computational techniques Finally some new challenges ahead are summarized including interdisciplinary cooperation and training big data sharing for scientific data mashups and privacy protect
