

# Computing Discounts Activity

## Context

When purchasing items, it is often not clear how much the total price will be after discounts are applied. For example, suppose you are buying a book for \$10.00 and a pencil for \$2.00. The store offers a 10% discount on the book and a 5% discount on the pencil. How much will you pay for the book and pencil after the discounts are applied? The store also offers a 10% discount on the total purchase. How much will you pay for the book and pencil after the 10% discount is applied to the total purchase?

Let  $B$  be the price of the book and  $P$  be the price of the pencil.

Let  $D_1$  be the discount on the book and  $D_2$  be the discount on the pencil.

Let  $D_3$  be the discount on the total purchase.

Let  $T_1$  be the total price of the book and pencil after the 10% discount is applied to the book and the 5% discount is applied to the pencil.

Let  $T_2$  be the total price of the book and pencil after the 10% discount is applied to the total purchase.

Figure 1: Computing Total Costs

Item	Price	Discount	Discounted Price
Book	\$10.00	10%	\$9.00
Pencil	\$2.00	5%	\$1.90
Total	\$12.00	10%	\$10.80
Discount	\$1.20	10%	\$1.08
Total	\$10.80	0%	\$10.80
Discount	\$1.20	10%	\$1.08

Figure 2: Applying Total Discounts

As the discounts are applied, the total price of the items decreases. How much will you pay for the book and pencil after the 10% discount is applied to the book and the 5% discount is applied to the pencil? How much will you pay for the book and pencil after the 10% discount is applied to the total purchase?

1. The 10% discount on the book is \$1.00, so the price of the book after the discount is \$9.00. The 5% discount on the pencil is \$0.10, so the price of the pencil after the discount is \$1.90. The total price of the book and pencil after the discounts are applied is \$10.90.
2. The 10% discount on the total purchase is \$1.20, so the price of the total purchase after the discount is \$10.80.
3. The 10% discount on the book is \$1.00, the 5% discount on the pencil is \$0.10, and the 10% discount on the total purchase is \$1.20, so the total price of the book and pencil after the discounts are applied is \$10.80.
4. The 10% discount on the total purchase is \$1.20, so the price of the total purchase after the discount is \$10.80.
