

How to write a critical review article

S A Hamed Hosseini

Lecturer, School of Humanities and Social Sciences, the University of Newcastle

Version 1.2 ©05/2014

A 'critical' literature review is supposed to 'critically examine' a rather solid literary body of arguments/ideas around a particular topic. The literary body of ideas around the topic (i.e. literature) may include theorizations, conceptualizations, and/or explanations based on empirical studies of the topic. Each body of ideas supports at least one thesis about the topic. The critical review can be structured through answering the following questions:

Critical Review Questions (CRQs):

Introduction:

1. What are the very core arguments thesis/theses developed in the literature around the topic? What are their findings (if the literature includes empirical research)? What theories are used or developed? How are the core concepts defined?
2. Where is the given literature located in its wider historical and intellectual/theoretical contexts? It is important not to consider the literature as an isolated body of arguments but rather to consider it in relation to other similar attempts to study the topic from different points of view.

For instance, if the topic is 'social class in the post-modern time', one body of ideas that you may like to focus on as your main theme can be the idea of meta-industrial class/labor as developed by eco-feminist theorist Ariel Salleh. The thesis is that the meta-industrial labor is a new social class that has the capacity to transform the capitalist relations due to some of its specific features. Historically, such a body of ideas around new classes has emerged in the context of post-Marxist, post cold war era as the result of failure of classical theories of class in explaining the recent changes in the class composition of modern societies. Here you need to explain how the idea of meta-industrial class can be related to and/or located in the wider context of recent theoretical attempts to theorize social classes in the post cold war (post-Marxist) era. You may briefly name a few other important theses with some overlaps and differences.

Discussion (Body):

3. To what extent are the arguments and the thesis embedded in them (as presented by the author(s) in the literature) supported by facts/evidence? How selective vs. inclusive are the authors in their approach to empirical evidence? Answering this question requires the reviewer to examine the given body of ideas or thesis in the literature in terms of its ability to back up the
