Cultural Landscape Report for Chatham, Fredericksburg & Spotsylvania National Military Park, Stafford County, Virginia Christopher M. Beagan, H. Eliot Foulds, 2019

A cultural landscape report is the primary document used by the National Park Service for management of its historically significant landscapes. This report has been developed consistent with the methodology outlined in *A Guide to Cultural Landscape Reports: Content, Process, and Techniques*. This report builds upon previous documentation including the park's enabling legislation, National Register of Historic Places documentation (2011 draft) and General Management Plan and Environmental Impact Statement (2013 draft). Previous cultural landscape research documentation and recommendations for Chatham include a Historic Structure Report and Preliminary Grounds Study (1978), Preliminary Historic Resource Study (1982), Historic Structure Preservation Guide Chatham Garden (1985), and Chatham A Landscape Introduction (2006). Additional research for this report has been undertaken at a thorough level of investigation which involves review of all available historic sources including primary and secondary source material. These sources are included in the references section. This report is organized into four chapters beginning with a detailed site history that traces the physical evolution of the Chatham landscape followed by up-to-date documentation of the existing conditions, an analysis and evaluation of the significance and integrity of the Chatham landscape based on existing National Register of Historic Places documentation and treatment recommendations that provide guidance for the long-term management of the landscape. Additional detailed information is included in appendices including a core area tree inventory and vegetation inventory for the walled garden.

Borobudur as Cultural Landscape Kiyoko Kanki, Laretna T. Adishakti, Titin Fatimah, 2015. Borobudur is a 9th century Buddhist temple site in Central Java, Indonesia. As a cultural landscape, Borobudur is a site of active discussion. Since the start of the International Field School on Borobudur Cultural Landscape Heritage, the site of Borobudur as a cultural landscape including its mountains, fields, villages, and historic tangible and intangible items has been considered in light of the role and potential role local communities and organizations have in conservation and the living environment. How can Borobudur as a cultural landscape be described? How are diverse activities related? How can individuals contribute to its sustainability? This comprehensive volume considers these questions and presents discussions by academics and local community members. The book considers cultural landscape heritage, saujana heritage, and discusses the idea of evolutive conservation. It presents geographical, geological, and ecological perspectives. It also investigates the ancient lake that once existed as well as the topography and landscapes. The book looks at the regional planning system and describes the history and potential of local communities and organizations with a focus on tourism and development.

environments is a relatively new and often misunderstood idea among preservationists but it is of increasing importance The essays collected in this volume case studies that include the Little Tokyo neighborhood in Los Angeles the Cross Bronx Expressway and a rural island in Puget Sound underscore how this approach can be fruitfully applied Together they make clear that a cultural landscape perspective can be an essential underpinning for all historic preservation projects
