**A Tempered and Humane Economy** Jannett

Highfill, Patricia Podd Webber, 2014-12-23 A tempered and humane economy finds a balance between the market principle economic reward follows economic contribution and the family economic principle respect abilities respect needs Markets are tempered by the wisdom gained from family experiences in the way that steel is iron tempered by fire A humane economy meets the needs and aspirations of all persons in the way that a well tempered musical instrument allows for the playing of music in every key without discord A Tempered and Humane Economy Markets Families and Behavioral Economics argues that economists must incorporate the insights of behavioral economics into their reflections on micro and macro economic policy The elephant in the room is how Americans are increasingly raising their children with an appropriate sense of entitlement and empowerment by involving them in decision making at home We raise our children to find or create a job they will love expecting that will make them highly productive Not all children have these advantages a problem we tackle head on but enough of them do to create a critical mass of young adults who will transform our economy in a positive way for persons everywhere along the income distribution Our vision for the U S Economy is one of tempered optimism and humane prosperity

The Lost Art of Economics David C. Colander, 2001 Economics is the study of a complex system in which simple laws are not always forthcoming That complexity mandates three branches of the profession positive normative and the art of economics The economics profession has focused on one of these positive economics and in doing so has lost the art of economics In a series of provocative essays the author argues that most of what economists do is applied policy which belongs in the art of economics not in normative or positive economics The essays explore the forces in academic institutions that have led economics to its current position as well as the implications of the lost art for the economics profession and its future In the end the author is positive about the future of the profession and predicts that in 2050 it will no longer be as Solow suggested it currently is the overeducated in pursuit of the unknowable Instead it will be the appropriately educated in search of the knowable The essays are written in a highly accessible style and can be enjoyed by most non economists as well as by those economists who don t take themselves too seriously It can be usefully read by all economists even those who do take themselves too seriously
