Diagnostics of Manipulations Heribert Wienkamp, 2025-01-27 Manipulations are encountered at every turn and in countless everyday situations. If this is the case, the early recognition of manipulations takes absolute precedence. This is especially true for specialists regarding their diagnostics and analysis. In everything that is presented and offered in verbal expressions, the tentative differentiation between fiction and truth is the focus of the events. Because only a reasonably complete and truthful outline of the problem contains the potential for gaining insight or uncovering lies or half truths. Lies, deceptions, excuses, etc. are manipulative activities or reactions that are intended to create a different, namely consciously false impression. However, manipulative maneuvers can be observed and require further investigation, not only in interpersonal situations but also in larger social contexts or systems, for example, to successfully play games like chess or to solve problems through regulations accepted by all. This publication could particularly benefit the following target groups: executives, HR experts in academia and practice, and specialists who need to assess the credibility of statements based on fiction and truth or who are involved in other support mandates.

Hanser, 2018-01-03 Essentials of Community Corrections offers students a concise and practical perspective on community corrections while emphasizing successful offender reentry through strong community partnerships. Author Robert D. Hanser draws on his expertise with offender treatment, planning, special needs populations, and the comparative criminal justice fields to present a complete introduction to community corrections today. A variety of practical pedagogical tools offer students insights into the daily lives of those working in the field, encouraging students to start thinking like practitioners. Key Features: What Would You Do assignments give students the chance to apply what they have learned by analyzing real world scenarios to determine the best course of action for common challenges in community supervision. Applied Theory inserts throughout the book provide a focused application of a specific theory to particular issues in community corrections. Cross National Perspective boxes demonstrate common themes in community corrections around the world as well as different approaches used in other countries. Applied Exercises encourage students to reflect on their understanding of each chapter's content and to demonstrate their competence in using the information, techniques, and processes that they have learned. Food for Thought features at the end of each chapter guide students through a recent research study related to community corrections and include follow-up questions to help students think critically. Sharing Your Opinion questions at the end of each chapter empower students to express their own views on the issues covered in the text. The free open access Student Study site features carefully selected video links, access to SAGE journal articles, and more. Instructors
