Technology in several forms especially Information Technology IT has a strong tendency to converge at varying degrees This phenomenon of converging innovation is likely to deepen and widen in the future due to intense competition in global markets Asian manufacturing firms in particular lead the global industrial innovation Convergent innovation exists as a constant disequilibrium between reference technology and matching technology innovations of these technologies occur at different degrees to attain an optimal balance Innovations as a result of convergence are often beneficial improving welfare and employment This book sheds light on the little discussed idea of convergent innovation with examples hailing from Asia The book also proposes new theories and investigates convergence at the micro level guaranteed food for thought for academics interested in innovation economics and management      **Study on Surface Finish for a CNC Milling Process**

change in innovation These categories are defense centric commercialization centric core competency centric innovation wave centric and fourth industrial revolution centric For each chapter a specific industrial product is selected for analysis and the longitudinal dynamics of demand articulation of emerging technologies are analysed The FMS Magazine ,1982
