Attaway, 2018-07-11 *MATLAB A Practical Introduction to Programming and Problem Solving* winner of TAA s 2017 Textbook Excellence Award Texty guides the reader through both programming and built in functions to easily exploit MATLAB s extensive capabilities for tackling engineering and scientific problems Assuming no knowledge of programming this book starts with programming concepts such as variables assignments and selection statements moves on to loops and then solves problems using both the programming concept and the power of MATLAB The fifth edition has been updated to reflect the functionality of the current version of MATLAB R2018a including the addition of local functions in scripts the new string type coverage of recently introduced functions to import data from web sites and updates to the Live Editor and App Designer Presents programming concepts and MATLAB built in functions side by side giving students the ability to program efficiently and exploit the power of MATLAB to solve technical problems Offers sections on common pitfalls and programming guidelines that direct students to best practice procedures Tests conceptual understanding of the material with Quick Questions and Practice sections within each chapter NEW TO THE FIFTH EDITION Use of MATLAB Version R2018a A revised Text Manipulation chapter which includes manipulating character vectors as well as the new string type Introduction to alternate MATLAB platforms including MATLAB Mobile Local functions within scripts The new output format for most expression types Introduction to the RESTFUL web functions which import data from web sites Increased coverage of App Designer Introduction to recording audio from a built in device such as a microphone Modified and new end of chapter exercises More coverage of data structures including categorical arrays and tables Increased coverage of built in functions in MATLAB      *Programming in MATLAB* Marc E. Herniter, 2001 Perfect for use in a lab or by individuals PROGRAMMING IN MATLAB is designed to help anyone interested in electrical and computer engineering develop programming skills using MATLAB as the programming language The text is also applicable for those interested in utilizing MATLAB in industry MATLAB is quickly surpassing C BASIC and Fortran in engineering departments as the programming language of choice due to the many functions and toolboxes the program features It allows the many students who use it to write complex programs to solve a variety of technical problems efficiently Herniter offers a straightforward approach to learning the program and assumes no prior exposure to MATLAB The book offers comprehensive instructions for programming in MATLAB including specific output results and numerous MATLAB screen captures Its use is ideal in a lab lecture setting where readers can recreate examples and complete problem assignments However the text organization is also appropriate for use as a general reference guide for programming MATLAB Herniter introduces fundamental programming skills then moves into solving basic problems using built in MATLAB functions and finally into solving engineering problems using MATLAB      Learning Programming Using Matlab Khalid Sayood, 2006-12-01 This book is intended for anyone trying to learn the fundamentals of

computer programming The chapters lead the reader through the various steps required for writing a program introducing the MATLAB constructs in the process MATLAB is used to teach programming because it has a simple programming environment It has a low initial overhead which allows the novice programmer to begin programming immediately and allows the users to easily debug their programs This is especially useful for people who have a mental block about computers Although MATLAB is a high level language and interactive environment that enables the user to perform computationally intensive tasks faster than with traditional programming languages such as C C and Fortran the author shows that it can also be used as a programming learning tool for novices There are a number of exercises at the end of each chapter which should help users become comfortable with the language
