Ernest Callenbach

Ecotopia Ernest Callenbach:

Ecotopia Ernest Callenbach,1996 Ecotopia Ernest Callenbach,2009-12-16 A novel both timely and prophetic Ernest Callenbach's *Ecotopia* is a hopeful antidote to the environmental concerns of today set in an ecologically sound future society. Hailed by the Los Angeles Times as the newest name after Wells Verne Huxley and Orwell Callenbach offers a visionary blueprint for the survival of our planet and our future. *Ecotopia* was founded when northern California, Oregon and Washington seceded from the Union to create a stable state ecosystem, the perfect balance between human beings and the environment. Now twenty years later, this isolated, mysterious nation is welcoming its first officially sanctioned American visitor. New York Times Post reporter Will Weston, skeptical yet curious about this green new world, Weston is determined to report his findings objectively. But from the start, he is alternately impressed and unsettled by the laws governing *Ecotopia*'s earth-friendly agenda: energy-efficient mini-cities to eliminate urban sprawl, zero-tolerance pollution control, tree-worship, ritual war games, and a woman-dominated government that has instituted such peaceful revolutions as the twenty-hour workweek and employee ownership of farms and businesses. His old beliefs challenged, his cynicism replaced by hope, Weston meets a sexually forthright *Ecotopian* woman and undertakes a relationship whose intensity will lead him to a critical choice between two worlds.

Ecotopia Ernest Callenbach,1978 **The Complete Ecotopia** Ernest Callenbach,2021 *The Complete Ecotopia* presents for the first time an early classic of environmental science fiction in its entirety. *The Sustainable Urban Development Reader* Stephen M. Wheeler, Timothy Beatley,2004 Bringing together classic readings from a wide variety of sources, this key book investigates how our cities and towns can become more sustainable. Thirty-eight selections span issues such as land use planning, urban design, transportation, ecological restoration, economic development, resource use, and equity planning. Section introductions outline the major themes, whilst the editors' introductions to the individual writings explain their interest and significance to wider debates. Additional sections present twenty-four case studies of real-world sustainable urban planning examples, sustainability planning exercises, and further reading. Providing background in theory, practical application, and vision in a clear, accessible format, *The Sustainable Urban Development Reader* is an essential resource for students, professionals, and indeed anyone interested in the future of urban environments.

Terraforming: Ecopolitical Transformations and Environmentalism in Science Fiction Chris Pak,2016-06-01 This book examines terraforming in science fiction and shows how, amidst contemporary anxieties about climate change, it has come to offer an important vantage from which to consider the ways humankind shapes and is shaped by their world.

Hemispheric Ecological Citizenship Claudia Pereira de Jesus,2026-02-01 In times of global crisis and uncertainty, narrative literary works serve not only as sources of pleasure but also as catalysts for social and political transformation. Across the American hemisphere, spanning languages, cultures, and national borders, recent utopian fiction presents alternative societies that critique historical and contemporary injustices in order to imagine more hopeful presents and

futures This volume examines how such texts articulate a constructive vision through the concept of hemispheric ecological citizenship proposing a collective understanding of humanity that reaches beyond the nation traditionally conceived as a site of exclusion and discrimination of the Other and instead situates dislocated citizens within a convivial sustainability oriented framework that prioritizes balanced relationships with nature

Designing Low Carbon Societies in Landscapes Nobukazu Nakagoshi, Jhonamie A. Mabuhay, 2014-05-09 This book focuses on three major means of achieving a low carbon society conservation of the ecosystem complex changes of arrangement of landscapes and creation of biodiversity There are specific countermeasures to be taken for carbon absorption in the three types of landscapes urban cultural and natural because their carbon balances differ Urban landscapes are promising sites because they have the potential for greening and the creation of biodiversity Cultural landscapes in the tropics had not been actively researched until recently but this book now presents a collection of several cases focused on those areas Natural landscapes had existed in abundance in developing countries later nature protection areas were designated to coexist with development Now however developmental pressure has penetrated into those nature protection areas and landscape ecological projects are urgently required to preserve them As a result of global warming abnormal weather phenomena including super typhoons have occurred frequently in recent years The major underlying cause is the higher concentration of greenhouse gases released by human activities As well major natural absorbers of CO₂ such as forests wetlands and coral reefs are shrinking and the human impact is causing the ecological balance to deteriorate Controlling CO₂ emissions and expanding the CO₂ absorbers are keys to reducing total CO₂ Low carbon societies can be established by maintaining the original CO₂ balance through integration of multiple tools with contributions from diverse fields such as physics and chemistry physiology and humanities and education On the basis of an international consensus the environment must be protected no matter what sacrifices are required As this book demonstrates achieving a low carbon society is a top priority and landscape conservation is the first step in ecological research toward that goal

The Ecotopian Encyclopedia for the 80's Ernest Callenbach, 1980

Historical Dictionary of Utopianism James Matthew Morris, Andrea L. Kross, 2004 Major utopian literary works and dystopian novels are also profiled because they have fueled the fires of time honored arguments about the feasibility of creating a perfect society From the early theoreticians who proposed political innovations and those who sought equality among people to those who insisted on hierarchy under a supreme leader or god to those who had more practical economic social and ethical plans this reference enables the reader to explore the Western desire to improve the world and the lives of its people

Persuasive Aesthetic Ecocritical Praxis Patrick D. Murphy, 2015-08-20 *Persuasive Aesthetic Ecocritical Praxis* continues Patrick D Murphy s focus on transversal ecocritical praxis by considering literature and cinema in terms of the persuasive force of aesthetic activity and whether or not artistic production and its criticism can be considered forms of activism Murphy argues that literature and other forms of aesthetic production hold out the promise of being able to move some individuals deeply through both affective and intellectual engagement in ways that facilitate ideological reflection To analyze aesthetic production ecocritically requires a transversal orientation in order to work continuously at accommodating a vast array of often seemingly disparate perspectives disciplines and contextual information as well as the ever changing thematic plot setting and contextual elements of the aesthetic works under consideration and the responses of changing audiences through time and across cultures Murphy demonstrates this approach through presenting theories of transversality and applying them with attention to issues of propaganda agitation and persuasion both in terms of artistic production and the criticism of such production He also brings an ecofeminist orientation to the fore with particular attention to the gendered economic aspects of environmental issues in an age of land grabs and plantation economies Along the way he treats a wide range of literary works films and miniseries In American literature he discusses realist and science fiction works from Susan Fenimore Cooper s *Rural Hours* to Paolo Bacigalupi s *The Windup Girl* Barbara Kingsolver s *Flight Behavior* to Kim Stanley Robinson s *2312* and Ana Castillo s *So Far from God* to Leslie Marmon Silko s *Gardens in the Dunes* In international literature he analyzes Mo Yan s *The Garlic Ballads* Jiang Rong s *Wolf Totem* Michiko Ishimure s *The Lake of Heaven* Miyuki Miyabe s *All She Was Worth* and other novels The book concludes with a reading of Ernest Callenbach s *Ecotopia* and *Ecotopia Emerging* an Afterword recommending further directions for transversal ecocritical research an and interview that discusses Murphy s previous book *Transversal Ecocritical Praxis* and provides some personal background on the author
