Metaphysics Stephen Mumford, 2012-08-30 Metaphysics is one of the traditional four main branches of philosophy alongside ethics logic and epistemology It is also an area that continues to attract and hold a fascination for many people yet it is associated with being complex and abstract For some it is associated with the mystical or religious For others it is known through the metaphysical poets who talk of love and spirituality This Very Short Introduction goes right to the heart of the matter getting to the basic and most important questions of metaphysical thought in order to understand the theory What are objects Do colours and shapes have some form of existence What is it for one thing to cause another rather than just being associated with it What is possible Does time pass By using these questions to initiate thought about the basic issues around substance properties changes causes possibilities time personal identity nothingness and emergentism Stephen Mumford provides a clear and simple path through this analytical tradition at the core of philosophical thought

Introduction to Metaphysics Jean Grondin, 2012-01-31 Jean Grondin completes the first history of metaphysics and respects both the analytical and the Continental schools while transcending the theoretical limitations of each He reviews seminal texts by Parmenides Plato Aristotle Plotinus and Augustine He follows the theological turn in the metaphysical thought of Avicenna Anselm Aquinas and Duns Scotus and he revisits Descartes and the cogito Spinoza and Leibniz's

rationalist approaches Kant's reclaiming of the metaphysical tradition and post-Kantian practice up to Hegel. He engages with twentieth-century innovations that upended the discipline, particularly Heidegger's revival of the question of Being and the rediscovery of the metaphysics of existence by Sartre and the Existentialists' language by Gadamer and Derrida, and transcendence by Levinas. Metaphysics is often dismissed as a form or epoch of philosophy that must be overcome yet by promoting a full understanding of its platform and processes. Grondin reveals its cogent approach to reality and foundational influence on modern philosophy and science. By restoring the value of metaphysics for contemporary audiences, Grondin showcases the rich currents and countercurrents of metaphysical thought and its future possibilities. Philosophical Foundations for a Christian Worldview J. P. Moreland, William Lane Craig, 2003-03-31 Arguments are clearly presented and rival theories are presented with fairness and accuracy. **BOOK JACKET** **Liaisons** Alvin I. Goldman, 1992 These essays by a major epistemologist reconfigure philosophical projects across a wide spectrum from mind to metaphysics from epistemology to social power. Several of Goldman's classic essays are included along with many newer writings. Together these trace and continue the development of the author's unique blend of naturalism and reliabilism. **An Elementary Christian Metaphysics** Joseph Owens, 1985 Joseph Owens presents an introduction to metaphysics designed to develop in the reader a habitus of thinking. Using original Thomistic texts and Etienne Gilson's interpretation of St. Thomas Aquinas, Owens examines the application of metaphysical principles to the issues that arise in a specifically Christian environment. An Elementary Christian Metaphysics focuses on questions of existence and the nature of revealed truths. Following his historical introduction to metaphysics, Owens provides a general investigation of the first principles and causes of being and also a study of knowledge and of the divine nature and attributes in light of natural reason. Irrespective of one's intellectual genotype, an exposure to the sustained developmental elucidation of Aquinas' insights executed by an author such as Owens can only enhance any metaphysical approach to reality. The New Scholastic: An Elementary Christian Metaphysics is intended primarily for undergraduate students as an introduction to metaphysics. The scope of the metaphysical study pursued by Owens includes not only a general investigation of beings but also an analysis of knowledge, epistemology, and of the divine nature, all in light of natural reason. Studies in Religion Joseph Owens, 1908-2005 taught philosophy at the Pontifical Institute of Mediaeval Studies and the University of Toronto for forty years. He is the author of a number of books, including An Interpretation of Existence, also published by the University of Notre Dame Press. **Metaphysics and Cognitive Science** Alvin I. Goldman, Brian P. McLaughlin, 2019-03-27 This volume illustrates how the methodology of metaphysics can be enriched with the help of cognitive science. Issues to which results from cognitive science are brought to bear include the metaphysics of time, of morality, of meaning, of modality, of objects, and of natural kinds, as well as whether God exists. **The method of science and its application to metaphysics. The rules of philosophising. Psychological principles. The limitations of knowledge** George Henry Lewes, 1874 An Introduction to Metaphysics Jack S. Crumley II, 2021-12-09 An

Form and Reason Edward Halper, 1993-08-03 This book uses the study of philosophical texts to raise and explore metaphysical issues On one level each essay addresses a scholarly issue in a classical text often a text of Aristotle's On a

deeper level the issues Halper considers are metaphysical However unlike thinkers who have brought linguistic analysis and contemporary metaphysical notions to these texts Halper approaches them to find their formulations of issues and their strategies of pursuit Halper is not concerned with the defense of metaphysical commitments but with finding and exploring paths of metaphysical inquiry The essays in this volume are exploratory and exegetical rather than decisive Their contribution to metaphysics lies in the issues they raise the methods they explore and their conception of metaphysics as a discipline rooted in philosophical problems
