**Technical Studies for Jazz Saxophone** Ray Reed,Robert B. **CHOPS 2: New Systems of Scale Patterns for the Advanced Saxophonist** Dan Graser,2021-06-15 Chops 2 continues the mission to modernize the existing pedagogical materials available for saxophone by providing a thorough collection of pattern work The focus is on a fundamental area that we have all been practicing since we first began the instrument However it has been my observation that the way we practice these very rarely develops to the level of the rest of our practice on both an intellectual and a musical level Even the most advanced students often practice their scales in the same form and manner as their earliest study and focus merely on speed and dexterity as the ONLY goal as opposed to just being one possible goal While we all understand that scale practice is necessary what exactly it is you should be accomplishing by practicing them is not always clear In this volume using the range of the modern saxophonist the advancing student will find many new ways to effectively develop their scale practice into a means to develop several fundamental areas at once and connect this practice meaningfully to other fundamentals etudes and repertoire Working with patterns is hardly a new concept when it comes to

the area of woodwind performance For generations there have been patterns and scale forms created to work with jazz improvisation and harmonic progressions develop characteristic technique for certain time periods of music and also quite plainly to provide some variety for students However many of these are not written down or transmitted effectively via demonstration or suggestion Thus if there isn't a tangible bit of material let alone a course for the student to work from they become easy to ignore and the student returns to the original scale form they had already learned Features Scale rotations with rhythmic and articulation variations using the full range scales introduced in Volume I A 30 day 30 way scale rotation that takes your existing scale work and makes a scheduled cycle of 30 unique variants to each scale 42 Diatonic Whole-tone and Diminished Scale Patterns 15 Chromatic Tetrachord and Hexachord Patterns
