Cahill, 2012-07-15 On a flight from Sacramento to Denver Professor Ken O Neal discovers he has a telepathic and loving connectedness with flight attendant Michelle Kolberg Believing that other sensitives probably exist in their midst they embark on the formation of a group of like minds they call the Omega Project at a University of California campus The Omega Project's benevolent communication is suddenly threatened by powerful people in San Francisco older men in secret Covens who use ancient mind control techniques to trap their telepathic victims and perform horrific deadly feedings on their brains to strengthen their own powers of domination A feeding on the brain of a university student named Bonny ignites warfare between the Covens and Omega members with gruesome fatalities Ken and Michelle learn more about the frightening control of the leaders of the Covens organization in Europe forcing Omega to go

bases What would people do while sitting around waiting for the end of the world as we knew it In this series many of the inhabitants work for the Defense Advanced Research Projects Agency doing advanced research developing very advanced technology So this book is part history part science fiction and a lot of speculation What would future everyday life look like How would door locks work How about access to your computer How about your computer itself How does one get from place to place in this futuristic world These items must be looked at from the standpoint of a three or four generation advancement
