Sustainable Residential Investing Anna Harper,2022-04-07
For investors from across the world, UK residential property is seen as one of the best investments available. This is for good reason. It has a track record of delivering strong, stable returns in a way that is relatively easy to understand and implement. The trouble is, the market has changed. The investors of the future value sustainability more than ever before. There is unprecedented and growing demand for Environmental, Social, and Governance (ESG) investing, now worth 30 trillion in Assets Under Management each year, around a quarter of all professionally managed assets. The traditional goal of profit maximisation is being replaced. Investments must increasingly be profitable as well as sustainable, economically resilient, with positive ESG metrics. Yet the UK residential property market, worth over 7.5 trillion, is lagging behind. There is very little clear, easily usable guidance for those responsible for a huge proportion of the market: private investors. The positive impacts of sustainable property investing for profit-motivated investors, people, and the planet could be huge. The financial, environmental, and social costs of getting it wrong could be catastrophic. To get this right and to avoid the risks of

getting it wrong it is vital to understand What sustainable residential property investing is What needs to change and How on a practical level you can invest in a way that is both profitable and sustainable This book draws on expertise from within and beyond real estate provides a simple framework for updating your approach It highlights common mistakes and shares advice so that you can avoid them Ultimately it s about answering the question of the decade How can I invest profitably with positive impacts

[World Economic Outlook, April 2019](#) International Monetary Fund. Research Dept., 2019-04-09 After strong growth in 2017 and early 2018 global economic activity slowed notably in the second half of last year reflecting a confluence of factors affecting major economies China s growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States The euro area economy lost more momentum than

expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards investment dropped in Italy as sovereign spreads widened and external demand especially from emerging Asia softened Elsewhere natural disasters hurt activity in Japan Trade tensions increasingly took a toll on business confidence and so financial market sentiment worsened with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year weighing on global demand Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US China trade deal but they remain slightly more restrictive than in the fall
