

Logical positivism

Knowledge is tested by positive verification, and the new theories are adopted as true.

There is nothing problematic about educational change. The teacher is a technician who applies educational models that have been tested and transmitted by experts.

Verification is by the empiricist scientific method. The primacy of observation.

Practical knowledge is learned by observation and imitation.

Principle of falsifiability (Popper)

Scientific theories change by falsification via conjecture and refutation.

Teachers' educational change is produced by dissatisfaction with their conceptions and teaching practices.

There exist crucial experiments that contradict the existing theories and hence provoke change.

The Soviet Critique of Neopositivism W.F. Boeselager, 2012-12-06 The first of the people to be thanked for their help during the composition of this work is Professor I M Bochenski under whom I had the good fortune to study for an extended period of time Without his help it is doubtful that this work would have been written at all Among the other professors who helped along the way I would like to cite in particular Professors A F Utz M D Philippe and N Luyten of the University of Fribourg Many friends were present at the birth of the ideas contained in this book By naming K G Ballestrin T I Blakeley and M F Gager I do not want to slight any of the rest It was A Spiekermann in Hollinghofen who saw to it that other preoccupations did not rob me of all the time needed for the study of the subject matter and to the composition of this treatise Of particular help in getting sources from the libraries of the world were Miss Lifschitz of the Institute of East European Studies and Mr Uldry of the Cantonal Library in Fribourg Switzerland Finally my patient typist Mrs Frey in Munster deserves special mention for her beautiful work

An Examination of Logical Positivism Julius Rudolph Weinberg, 2013-12-19 First published in 2000 This is Volume II of six in the Library of Philosophy series on the Philosophy of Science Written in 1938 philosophical systems which employ logical methods almost exclusively would undoubtedly be expected to produce non empirical results If however logic is taken simply as a method of connecting meanings it is not difficult to reconcile logical methods with empirical results If logical formulas in other words assert nothing about the meanings of propositions but simply show how such meanings are connected then an empiricism based on a logical analysis of meanings is not inconsistent This is what the Logical Positivists have attempted to do This book looks at two areas the foundations of a scientific method free from metaphysics and the elimination of pseudo concepts introduced by metaphysics into science and philosophy

 argues that the objectivist and deterministic assumptions of mainstream policy analysis which are based on the Newtonian
 positivist worldview or mind set should be transcended After demonstrating that the favored methods of mainstream policy
 analysis are based on Newtonian ontological and positivist epistemological assumptions and that the connections between
 these two are intimately and historically related he critically assesses and highlights the contributions of quantum mechanics
 complexity theory and cognitive science to a new mind set in scientific knowledge a post Newtonian and postpositivist mind
 set Newtonian positivist and post Newtonian postpositivist worldviews are conceptualized as fuzzy mind sets that is they are
 not mutually exclusive and that they share assumptions at varying degrees Cognitive science shows that some of the
 fundamental concepts and assumptions of the Newtonian positivist philosophy such as the concept of causality and the
 tendency to categorize reality reductionist thinking are the products of the evolutionary adaptation of the human mind and
 they have become its built in defaults As Morcol suggests we cannot change the biological defaults of our minds but we can
 change our way of thinking to an extent through a cultural evolution He argues that conscious efforts can be made in policy
