Effective Learning and Teaching in Engineering Caroline Baillie, Ivan Moore, 2004-08-19 Written to meet the need of teachers lecturers and tutors at all stages in their career this is the authoritative handbook for anyone wanting to and understanding

the key issues best practices and new developments in the world of engineering education and training The book is divided into sections which analyse what students should be learning how they learn and how the teaching and learning process and your own practice can be improved With contributions from experts around the world and a wealth of innovative case study material this book is an essential purchase for anyone teaching engineering today The Effective Learning and Teaching in Higher Education series deals with improving practice in higher education Each title is written to meet the needs of those seeking professional accreditation and wishing to keep themselves up to date professionally

Reconstructing Professionalism In University Teaching Walker, Melanie,2001-07-01 How can academics carve out new and effective ways of working with students against a background of constant change and policy pressure How can university teachers both enhance student learning and realize their own educational values What might be the shape of a new professionalism in university teaching At the heart of this book is a small group of academics from very different disciplines making sense of their teaching situations We witness each of their struggles and celebrations in designing a new course engaging a large first year class introducing a mentoring programme nurturing independent learning through project work using debates to develop students critical thinking and evaluating the success of their teaching This book is the story of a higher education project and central to the story are the attempts of university teachers to enact a critical professionalism in their everyday lives in teaching and learning and also their development of a shared and collaborative dialogue Each of the team seeks not only to improve their practice of teaching but also to explore amongst themselves what kind of professional they want to be and how to realize it in their work with students Reconstructing Professionalism in University Teaching reveals how academics working together on researching their own teaching can both improve their students learning and start to redefine their own professional roles

Applications of Mathematics in Engineering and Economics'33 Michail D. Todorov,2007-10-23 The main goal of this series of Conferences is to bring together experts and young talented scientists from Bulgaria and abroad to discuss modern trends and to ensure exchange of views in various applications of mathematics in the fields of engineering physics economics biology etc Keeping the main topics of the previous AMEE conferences the 33rd issue was subject to the motto Nonlinear phenomena mathematical theory and environmental reality

Mathematical Education of Engineers L. R. Mustoe,Stephen Hibberd,1995 Much debate has centered around the decreasing mathematical ability of students entering higher education as well as the discrepancy between skills found in the UK and Europe in mathematics This collection of articles from leading researchers and teachers considers solutions to this problem with suggestions outlined for new methods of teaching the subject Topics include the application of mathematics to engineering careers the problems of wider access to higher education and current practices that are helping to tackle them teaching experience from varying educational establishments and computer based teaching and assessment The discussions presented here should be read by anyone involved in mathematics education and engineering

Evaluating and Improving

Undergraduate Teaching in Science, Technology, Engineering, and Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2003-01-19

Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness. Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology. Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change. What is good undergraduate teaching? This book discusses how to evaluate undergraduate teaching of science, mathematics, engineering, and technology and what characterizes effective teaching in these fields. Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures and how practices in rewarding researchers could be transferred to the teaching enterprise. How should administrators approach the evaluation of individual faculty members? And how should evaluation results be used? The committee discusses methodologies, offers practical guidelines, and points out pitfalls. Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields. **Industrial Engineering** George Worthington, 1923

Mathematics for Engineers Anthony Croft, Robert Davison, 2000. An accessible step-by-step approach to teaching mathematics with today's engineering student in mind. The content is divided into manageable pieces of work blocks focusing on one specific technique, and the explanations are gradually developed through fully worked and part-worked examples. Highlighted key points and use of icons throughout the book aid understanding of the mathematical concepts being presented. Engineering and Finance, 1922. Highway Engineer and Contractor. ..., 1920. Bulletin ... Vocational Education Series Canada. Dept. of Labour. Technical Education Branch, 1921. *The British National Bibliography* Arthur James Wells, 2001.
