Summary of Rollo May's The Courage to Create

Everest Media, 2022-05-15T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 We are living in an age of limbo where one age is dying and the new age is not yet born We cannot ignore the changes in sexual mores marriage styles family structures education and religion 2 Courage is the foundation that underlies and gives reality to all other virtues It is not a virtue or value among other personal values like love or fidelity It is the basis that underlies and gives reality to all other virtues 3 The most simple and obvious form of courage is physical We need a new form of physical courage that will neither run rampant in violence nor require our assertion of egocentric power over other people 4 Moral courage is the second type of courage It is the courage to stand up for what is right even if it means standing alone It is based on one's capacity to perceive the suffering of others and it arises from compassion for that suffering

The Mind-Brain Continuum Susan Gordon, 2023-01-01 This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and naturopathic medicine The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one's sense of self and well being The book challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine activity and links it to female neurology and the development of one's sense of self She brilliantly places this activity which serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics Her psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and neurology This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science's understanding of behavior experience consciousness and human agency Stanley Krippner PhD Affiliated Distinguished Faculty California Institute of Integral Studies San Francisco CA In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind brain and organism Drawing on empirical research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the

endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but it is also continually modulated and influenced by the subject s experience of his or her world In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind Thomas Fuchs MD PhD Karl Jaspers Professor of Philosophy and Psychiatry University of Heidelberg DE The Idea of Creativity Michael Krausz, Denis Dutton, Karen Bardsley, 2009

Seventeen philosophers scientists and artists consider questions about the intriguing idea of creativity Is creativity essentially mysterious Is creativity essentially inspirational or rationalistic What role does skill play in creativity What are the criteria of creativity Should we assign logical priority to creative persons creative processes or creative products How do forms of creativity relate to different domains of human activity How does creativity relate to self transformation How does our knowledge of the circumstances of creativity effect our appreciation of its products Can a recipient of a creative work also be a creator of it Contributors include Margaret Boden Larry Briskman John M Carvalho David Davies Berys Gaut Rom HarrA c Carl R Hausman Albert Hofstadter Arthur Koestler Michael Krausz Peter Lamarque Thomas Leddy Paisley Livingston Michael Polany Dean Keith Simonton and Francis Sparshott
