**The Haitian Media System and its Main Characteristics: A Model of the Precarious System of Democratic Transition**  
Wisnique Panier,2023-06-26 This book presents a new theoretical model of a media system called the model of the precarious system of democratic transition The latter is based on fifteen parameters that characterize the Haitian media system and the environment in which it evolves This is a significant contribution to advancing knowledge in media studies and public communication in general After carefully analyzing different models of media systems existing in the scientific literature including the three models proposed by Halin and Mancini 2004 the author concludes that none of them applies to the typical Haitian case His study confirms the limitations of media system models resulting from Halin and Mancini s comparative studies in the context of Western countries It is a real reference document that gives an unprecedented reading grid to analyze the media systems of non Western countries particularly African or Latin American countries which have characteristics similar to that of Haiti Indeed in his doctoral thesis the author concluded that the Haitian media system has transformed over the past 60 years under the influence of three sets of factors linguistics democratic and technological Nevertheless he comes to the conclusion that the changes observed are only in the relations between the actors of the system without leading to a reconfiguration of the system The main characteristics of the Haitian media system and its environment remained unchanged from 1957 to 2022 So there is an inertia that keeps the system in an initial state

Polish Media System in a Comparative Perspective Boguslawa Dobek-Ostrowska, 2019 A media system does not exist in a vacuum It develops and grows within social political and economic systems They interact with and influence one another as well as stimulate each other's development The main subject of this work is the dynamically evolving Polish media system which is under the influence of institutions and external stakeholders Thanks to this it is easier to understand that the crossroads is not only a problem of the Polish media system but a global one For this reason a comparative perspective is employed Three chapters help to provide an answer to research questions dedicated to political parallelism and journalistic professionalization The analysis would be limited and unrepresentative if the book enclosed it with one country's border omitting the broad global European and Centro European context

**Central and Eastern European Media in Comparative Perspective** John Downey, Sabina Mihelj, 2016-04-15 Appearing more than twenty years after the revolutions in Central and Eastern Europe this book could not have come at a more appropriate time a time to take stock not only of the changes but also the continuities in media systems of the region since 1989 To what extent are media institutions still controlled by political forces To what extent are media markets operating in Central and Eastern Europe Do media systems in Central and Eastern Europe resemble media systems in other parts of Europe The answers to these questions are not the same for each country in the

region Their experience is not homogeneous An international line up of distinguished experts and emerging scholars methodically examine the different economic political cultural and transnational factors affecting developments in media systems across Central and Eastern Europe Whereas earlier works in the media system tradition have in the main adopted the political framework of comparative politics the authors argue that media systems are also cultural and economic institutions and there are other critical variables that might explain certain outcomes better Topics discussed range from political economy to gender inequality to the study of ethno cultural diversity This unmatched volume gives you the unique opportunity to study the growing field of comparative media analysis across Eastern and Western Europe A valuable resource that goes beyond the field of media and cultural analysis which media scholars as well as to area specialists should not go without
