**Joseph Smith's Translation** Samuel Morris Brown, 2020-05-04 Mormonism's founder Joseph Smith claimed to have translated ancient scriptures. He dictated an American Bible from metal plates reportedly buried by ancient Jews in a nearby hill and produced an Egyptian Book of Abraham derived from funerary papyri he extracted from a collection of mummies he bought from a traveling showman. In addition, he rewrote sections of the King James Version as a New Translation of the Bible. Smith and his followers used the term translation to describe the genesis of these English scriptures, which remain canonical for the Church of Jesus Christ of Latter-day Saints. Whether one believes him or not, the discussion has focused on whether Smith's English texts represent literal translations of extant source documents. On closer inspection, though, Smith's translations are far more metaphysical than linguistic. In Joseph Smith's Translation, Samuel Morris Brown argues that these translations express the mystical power of language and scripture to interconnect people across barriers of space and time, especially in the developing Mormon temple liturgy. He shows that Smith was devoted to an ancient metaphysics, especially the principle of correspondence, the concept of "as above, so below" that provided an infrastructure for bridging the human and the divine, as well as for his textual interpretive projects. Joseph Smith's projects of metaphysical translation place Mormonism at the productive edge of the transitions associated with shifts toward secular modernity. This transition into modern worldviews intensified complexly in nineteenth-century America. The evolving legacies of Reformation and Enlightenment were the sea in which early Mormons swam, says Brown. Smith's translations and the theology that supported them illuminate the power and vulnerability of the Mormon critique of American culture in transition. This complex critique continues to resonate and illuminate to the present day.     **The Engineer** ,1913     English Mechanic and Mirror of Science ,1917     *The Country Gentleman* ,1908     **Engineering Record, Building Record and Sanitary Engineer** Henry Coddington Meyer, Charles Frederick Wingate, 1902
