Objectives The purpose of *Top Down Network Design* Third Edition is to help you design networks that meet a customer s business and technical goals Whether your customer is another department within your own company or an external client this book provides you with tested processes and tools to help you understand traffic flow protocol behavior and internetworking technologies After completing this book you will be equipped to design enterprise networks that meet a customer s requirements for functionality capacity performance availability scalability affordability security and

manageability Audience This book is for you if you are an internetworking professional responsible for designing and maintaining medium to large sized enterprise networks If you are a network engineer architect or technician who has a working knowledge of network protocols and technologies this book will provide you with practical advice on applying your knowledge to internetwork design This book also includes useful information for consultants systems engineers and sales engineers who design corporate networks for clients In the fast paced presales environment of many systems engineers it often is difficult to slow down and insist on a top down structured systems analysis approach Wherever possible this book includes shortcuts and assumptions that can be made to speed up the network design process Finally this book is useful for undergraduate and graduate students in computer science and information technology disciplines Students who have taken one or two courses in networking theory will find Top Down Network Design Third Edition an approachable introduction to the engineering and business issues related to developing real world networks that solve typical business problems Changes for the Third Edition Networks have changed in many ways since the second edition was published Many legacy technologies have disappeared and are no longer covered in the book In addition modern networks have become multifaceted providing support for numerous bandwidth hungry applications and a variety of devices ranging from smart phones to tablet PCs to high end servers Modern users expect the network to be available all the time from any device and to let them securely collaborate with coworkers friends and family Networks today support voice video high definition TV desktop sharing virtual meetings online training virtual reality and applications that we can t even imagine that brilliant college students are busily creating in their dorm rooms As applications rapidly change and put more demand on networks the need to teach a systematic approach to network design is even more important than ever With that need in mind the third edition has been retooled to make it an ideal textbook for college students The third edition features review questions and design scenarios at the end of each chapter to help students learn top down network design To address new demands on modern networks the third edition of Top Down Network Design also has updated material on the following topics Network redundancy Modularity in network designs The Cisco SAFE security reference architecture The Rapid Spanning Tree Protocol RSTP Internet Protocol version 6 IPv6 Ethernet scalability options including 10 Gbps Ethernet and Metro Ethernet Network design and management tools

Computer Networking with Internet Protocols and Technology William Stallings,2004 Building on the strength of his two other successful texts Stallings new text provides a fresh Top Down and comprehensive Top Down survey of the entire field of computer networks and Internet technology including an up to date report of leading edge technologies It emphasizes both the fundamental principles as well as the critical role of performance in driving protocol and network design The basic themes of principles design approaches and standards throughout the text unify the discussion

Computer Networking: Top Down Approach Featuring Internet Environments Kurose,Umar,2001-08-01 **Mastering Computer Networking Technologies** Liam Norman,2018-05-19 Mastering Computer Networking Technologies is designed

to help students understand the basics of data communications and networking and the protocols used in the Internet in particular by using the protocol layering of the Internet and TCP IP protocol suite Technologies related to data communication and networking may be the fastest growing in today s culture The appearance of some new social networking applications is a testimony to this claim In this Internet oriented society specialists need to be trained to run and manage the Internet part of the Internet or an organization s network that is connected to the Internet As both the number and types of students are increasing it is essential to have a textbook that provides coverage of the latest advances while presenting the material in a way that is accessible to students with little or no background in the field Using a top down approach Mastering Computer Networking Technologies presents this highly technical subject matter without relying on complex formulas by using a strong pedagogical approach supported by numerous figures This textbook brings the beginning student right to the forefront of the latest advances in the field while presenting the fundamentals in a clear straightforward manner Students will find better coverage improved figures and better explanations on cutting edge material The top down approach allows instructors to cover the material in one course rather than having separate courses on data communications and networking

Communication Networks Alberto Leon-Garcia, Indra Widjaja, 2000 Addressing networks from a top down approach this book introduces the readers to the big picture of networks in general so that they may see how the various parts of the network fit in to the picture The book is organized into six sections that progressively consider the networking functions in greater level of detail The book presents a balanced view of all important elements of networking and is organized so that all relevant topics can be covered at some minimum level of detail
