Faulkner,1996 **Computer Network Architectures and Protocols** Paul Eliot Green,1982 This is a book about the bricks and mortar out of which are built those edifices that so well characterize late twentieth century industrial society networks of computers and terminals Such computer networks are playing an increasing role in our daily lives somewhat indirectly up to now as the hidden servants of banks retail credit bureaus airline reservation offices and so forth but soon they will become more visible as they enter our offices and homes and directly become part of our work entertainment and daily living The study of how computer networks work is a combined study of communication theory and computer science two disciplines appearing to have very little in common The modern communication scientist wishing to work in this area finds himself in suddenly unfamiliar territory It is no longer sufficient for him to think of transmission modulation noise immunity error bounds and other abstractions of a single communication link he is dealing now with a topologically complex interconnection of such links And what is more striking solving the problems of getting the signal from one point to another is just the beginning of the communication process The communication must be in the right form to be routed properly to be handled without congestion and to be understood at the right points in the network The communication scientist suddenly finds himself charged with responsibility for such things as code and format conversions addressing flow control and other abstractions of a new and challenging kind **IEEE International Conference on Networks** Jadwiga Indulska,Aruna Seneviratne,1999 Proceedings of the conference held September October 1999 A total of 50 contributions discuss aspects of WDM protocols multicast communication teletraffic engineering mobile communication network management asynchronous transfer mode internet and ATM protocols CDMA systems network QoS satellite systems communication systems security and multimedia communications Contains no index other than an author index Annotation copyrighted by Book News Inc Portland OR The British National Bibliography Arthur James Wells,2006
