Diving Medicine:

The Physician's Guide to Diving Medicine C.B. Carlston,R.A. Mathias,C.W. Shilling,2012-12-06 This book is designed to be a physician s guide for those interested in diving and hyperbaric environments It is not a detailed document for the erudite researcher rather it is a source of information for the scuba diving physician who is searching for answers put to him by his fellow nonmedical divers Following the publication of The Underwater Handbook A Guide to Physiology and Performance for the Engineer there were frequent requests for a companion volume for the physician This book is designed to fill the void Production of the book has been supported by the Office of Naval Research and by the Bureau of Medicine and Surgery Research and Development Command under Navy Contract No NOOOOI4 78 C 0604 Our heartfelt thanks go to the many authors without whose contributions the book could not have been produced These articles are signed by the responsible authors and the names a e also listed alphabetically in these preliminary pages Every chapter was officially reviewed by at least one expert in the field covered and these reviewers are also listed on these pages Our thanks go to them for their valuable assistance We are grateful to Marthe Beckett Kent for editing Chapter III Our thanks also go to Mrs Carolyn Paddon for typing and retyping the manuscripts and to Mrs Catherine Coppola who so expertly handled the many fiscal affairs

Diving Medicine Olaf Rusoke-Dierich,2018-08-27 This book is the very first to cover the decompression theory in detail It gives many information on all topics of the diving medicine and is richly and uniquely illustrated It offers a good guideline of high quality practice in diving medicine The author provides a very structured and easy to understand book by covering all aspects of the diving medicine such as equipment physiology and related issues as gas intoxications venomous animals or damages that can occur in the diving practice Relevant physiological and anatomical illustrations enlight even complex topics The Diving medicine book will appeal to health experts like doctors and nurses but also to diving schools and teachers

Scuba Physiological Costantino Balestra,Peter Germonpre,Simon Pridmore,2019-12-09 If you are a diver what you learned about topics such as decompression sickness and narcosis in your scuba diving classes is unlikely to have been as complete as you thought Most of it will have been over simplified and some of it will just have been plain wrong as diver training agency texts have not kept pace with the science Scuba Physiological gives you a chance to catch up A recent book called The Science of Diving was a collation of work done by scientists in the field of decompression research as part of a three year project called PHYPODE Physiology of Decompression The book did not reach the diving public mainly because it was written by scientists for other scientists and they speak a different language than most of us Simon Pridmore is not an expert on diving medicine but he knows something good when he sees it When Simon read The Science of Diving with help from Google he thought it was worthwhile working on it to try to make it more accessible The original authors agreed that this was a good idea and Scuba Physiological is the result There have been great advances to make diving safer but despite nearly 170 years of research the fundamental nature of decompression sickness and decompression stress remains unknown

and there are still glaring gaps in our knowledge Scuba Physiological provides a good summary of what we know as well as a glimpse of where the science is taking us and some invaluable tips to make you a safer diver now Among many other things you will learn 1 Pre dive hydration exposure to heat whole body vibration and oxygen breathing may reduce the risk of DCS 2 Post dive our bodies have most bubbles running around them 30 to 40 minutes AFTER we have surfaced Post dive hydration and certain other post dive behaviours are therefore also essential 3 The effects of nitrogen narcosis continue for a period of time AFTER a dive 4 All dive computers have a known DCS risk rate 5 Exercise during the period up to 120 minutes after surfacing may increase your risk of DCS 6 Never use a weightlifter s breath hold and release technique when pulling yourself into the boat post dive 7 A little dark chocolate before a dive may be a good thing for you What the experts say This book makes it easy to understand the latest discoveries in diving research and our current understanding of what happens to our bodies when we dive JP Imbert Decompression designer and technical diving pioneer There are some lovely thought provoking ideas and questioning of current dogma This book is well worth the read Dr Ian Sibley Calder HSE Approved Medical Examiner of Divers Occupational Health Physician If you ask a lay person what causes DCS they will likely tell you I don t know I think it has something to do with bubbles If you ask a dive instructor they might discuss things like shaking a soda bottle And if you ask a physician you may get an account referring to things like leukocyte adhesion the coagulation of components inside a vein and the endothelium lining Finally you find one of the top people in the world who do hyperbaric research on divers ask them the same question and they will say I don t know I think it has something to do with bubbles The bottom line is that we don t necessarily know what causes DCS This book is an excellent discussion of what the third person you asked in the above scenario might say It is an enjoyable simplified read of a complex subject and easy for a non scientist to comprehend I consider this an essential text for every diver s shelf Joseph Dituri PhD c CDR US Navy Saturation Diving

Diving Medicine for Scuba Divers Carl Edmonds, Bart McKenzie, Robert Thomas, 1992 Divin medicine explain by experts in clear and simple terms and in a very intersting and entertaining manner **Diving and Subaquatic Medicine** Carl Edmonds, Michael Bennett, John Lippmann, Simon Mitchell, 2015-09-11 Considered an essential resource by many in the field Diving and Subaquatic Medicine remains the leading text on diving medicine written to fulfil the requirements of any general physician wishing to advise their patients appropriately when a diving trip is planned for those accompanying diving expeditions or when a doctor is required to assess **Scuba Physiological** Simon Pridmore, 2021-10-26 If you are a diver what you learned about topics such as decompression sickness and narcosis in your scuba diving classes is unlikely to have been as complete as you thought Most of it will have been over simplified and some of it will just have been plain wrong as diver training agency texts have not kept pace with the science Scuba Physiological gives you a chance to catch up A recent book called *The Science of Diving* was a collation of work done by scientists in the field of decompression research as part of a three year project called PHYPODE Physiology of Decompression The book did not reach the diving public mainly because

it was written by scientists for other scientists and they speak a different language than most of us Simon Pridmore is not an expert on diving medicine but he knows something good when he sees it When Simon read The Science of Diving with help from Google he thought it was worthwhile working on it to try to make it more accessible The original authors agreed that this was a good idea and Scuba Physiological is the result There have been great advances to make diving safer but despite nearly 170 years of research the fundamental nature of decompression sickness and decompression stress remains unknown and there are still glaring gaps in our knowledge Scuba Physiological provides a good summary of what we know as well as a glimpse of where the science is taking us and some invaluable tips to make you a safer diver now Among many other things you will learn 1 Pre dive hydration exposure to heat whole body vibration and oxygen breathing may reduce the risk of DCS 2 Post dive our bodies have most bubbles running around them 30 to 40 minutes AFTER we have surfaced Post dive hydration and certain other post dive behaviours are therefore also essential 3 The effects of nitrogen narcosis continue for a period of time AFTER a dive 4 All dive computers have a known DCS risk rate 5 Exercise during the period up to 120 minutes after surfacing may increase your risk of DCS 6 Never use a weightlifter s breath hold and release technique when pulling yourself into the boat post dive 7 A little dark chocolate before a dive may be a good thing for you What the experts say With this latest volume Simon Pridmore makes a significant contribution to the body of practical knowledge in the science of scuba diving If you are looking for a thorough understanding of the science of diving and how it might be impacting your safety and enjoyment of diving this book is a must read Dan Orr President Academy of Underwater Arts Sciences and President Emeritus Divers Alert Network Foundation This book makes it easy to understand the latest discoveries in diving research and our current understanding of what happens to our bodies when we dive JP Imbert Decompression designer and technical diving pioneer There are some lovely thought provoking ideas and questioning of current dogma This book is well worth the read Dr Ian Sibley Calder HSE Approved Medical Examiner of Divers Occupational Health Physician This book is an excellent discussion of the issues It is an enjoyable simplified read of a complex subject and easy for a non scientist to comprehend I consider this an essential text for every diver s shelf Joseph Dituri PhD c CDR US Navy Saturation Diving [Bove and Davis' Diving Medicine](#) Alfred A.
