Sandy Materials in Civil Engineering Saeed Nemati, Farzaneh Tahmoorian, 2020-07-22 As the world moves further into urbanization there is a greater need for construction materials to meet society's needs. As natural resources become scarce the use of recycled materials for construction purposes has become increasingly common. Over the past decade there has been a significant increase in the utilization of recycled materials in the construction industry. This will result in substantial advantages in structure and infrastructure construction coupled with a reduction in the construction cost as well as improving sustainability. However, significant development limitations and many relevant considerations must be addressed when using recycled materials in construction. This book introduces innovative and alternative construction materials used in civil engineering.

Sharma, Dr. Jitendra Singh Yadav, Dr. Pankaj Munjal, Dr. Amit Kumar Jaglan, 2026-01-21 This book presents the proceedings of the International Conference on Sustainable Planning Architecture and Civil Engineering SPACE 2026 hosted by the National Institute of Technology Kurukshetra. In an era of rapid urbanization and climate change building resilient and sustainable infrastructure has become an urgent global imperative. This volume addresses that need offering a vital platform for interdisciplinary dialogue among researchers, architects, engineers, and policymakers. Focusing on the integration of sustainability across the entire lifecycle of the built environment the compendium explores innovative theories and practical applications. Key themes include sustainable architecture, smart infrastructure, energy efficient technologies, water management, and the use of advanced digital tools like AI, IoT, and GIS. Featuring rigorously peer-reviewed research papers organized into thematic sections this publication serves as a valuable reference for academics and professionals. It aims to stimulate further innovation and collaboration providing actionable insights for developing the sustainable resilient cities of the future. The collective knowledge within these pages contributes meaningfully to the global pursuit of balanced and inclusive growth.
