point the average person is going to hit a wall There are a number of reasons why developers are called upon to adjust a Magento website It is a very robust system even at its most basic Once you begin to integrate with other systems or introduce tens of thousands of products businesses often need the assistance of experienced developers As an example we ve had clients need additional options for how they view their dashboard Typically you might be able to select viewing products in groups of 5 25 and or 50 We have a client who wants to view 2000 The functionality can be changed only up to a point beyond that it needs to be customized by an expert who really understands Magento and follows best practices Experienced developers will also tell you that speed is of the essence in ecommerce No one wants to have to wait for systems to reload when you re doing a lot of online shopping With such a robust list of features native to the application strains can be put on your server While we haven t yet had a Magento client require more than one server for their online store I can foresee that situation arising in the future Benefits of using Magento Easy to install and add additional layouts and plug ins Open source technology that offers flexible scalable ecommerce solutions Effective and cost sensitive program Allows for various discounts and promotions during check out Provides more than 50 payment gateways
