Charles S. Parker, Thomas Case, 1993 This second edition has retained the clear easy to read writing style and managerial perspective of the previous edition The book employs two important themes throughout The strategy theme focuses readers on information systems goals and the action theme emphasizes the roles of people in information systems balancing technical issues with managerial issues [Investigating the Optimum Manager-Subordinate Relationship of a Discontinuity Theory of Managerial Organizations: An Exploratory Study of a General Theory of Managerial Hierarchy](#) Sergey Ivanov, 2018-07-15 This book explores the requisite relationship between managers and their subordinates in managerial hierarchies as stipulated by a general theory of managerial hierarchy GTMH developed by Dr Elliott Jaques Dr Jaques writes When managers and immediate subordinates are in roles in adjacent layers things can work well if within same layer the manager is breathing down the necks of the subordinates if more than one layer apart the manager is pulled down in the weeds Jaques empirical finding of the Manager Subordinate Relationship MSR describes how a subordinate in a managerial hierarchy feels towards the manager and how the manager feels towards the subordinate Optimum MSR is achieved when the subordinate feels just right towards the manager In Optimum MSR the manager also feels just right towards the subordinate and that the subordinate does not pull the manager into the weeds In the non Optimal Manager Subordinate Relationship non effective management according to Dr Jaques theory the subordinate reports either that the manager is too close breathing down the necks or too far pulled down into the weeds The manager in non Optimum MSR also reports either of the two conditions that the subordinate is either too close or too far The relationship between the working stratum of managers and subordinates and Jaques manager subordinate relationship types has not been tested This study is the first attempt to test these specific theoretical propositions developed by Jaques and possibly advance general theory of managerial hierarchy The study s primary research question is whether there is a relationship between the working roles of the managers and subordinates and Jaques MSR The study s exploratory secondary research question attempts to discover the effects of the current potential capability of manager and subordinate on the MSR as defined by Jaques and Cason The effects of current potential capability on the MSR are not described by general theory of managerial hierarchy though Dr Jaques discussed privately with the author the possibility that capabilities may play a significant part in addition to the working stratum impacting the manager subordinate relationship The exploratory proposition of the secondary question is whether MSR correlates strongly when the manager s role is one stratum higher than the subordinate s role and the manager s current potential capability CPC corresponds with the manager s role stratum and the subordinate s current potential capability corresponds with the subordinate s role stratum The author believes it is possible to test the primary research question and thus test this aspect of the theory this proposition has not been tested Furthermore the secondary question could potentially advance the theory relating capabilities of managers and subordinates to their working strata [Learning Together Online](#) Starr Roxanne Hiltz, Ricki Goldman, 2004-09-22 This book addresses the past and future of research on the effectiveness of asynchronous

learning networks courses in which students and teachers learn together online via the Internet An integrated theoretical framework called Online Interaction Learning
