

Tecnomatix Plant Simulation for the food and beverage industry

Benefits

- Identify and fix bottlenecks
- Develop optimal cleaning strategies
- Define quantified measures to optimize output up to 30 percent
- Invest in the right equipment
- Determine feasible and robust production plans
- Secure product quality by a stable and harmonized production flow
- Minimize discarded material

Summary

Seasonal demands, high product turnover, high flexibility for new products and multi-variety packs, as well as quality and freshness are among the challenges in engineering for food and beverage production plants. With highly automated sophisticated technologies and expensive equipment, it is particularly important to ensure that manufacturing processes meet current and future needs.

To manage these challenges, simulation is the tool to implement fully validated new processes that are "right the first time." Using simulation, you can determine the most cost effective and future-proof planning solution. Alternate planning scenarios can be compared to select the best balance between performance, flexibility and investment. By using simulation, it is easy to identify bottlenecks and to plan the best strategy for increasing plant output.
