Why The West Rules For Now:

Why the West Rules—for Now Ian Morris, 2010-10-12 A New York Times Notable Book of the Year A remarkable book an important book one that challenges stimulates and entertains Anyone who does not believe there are lessons to be learned from history should start right here The Economist Sometime around 1750 English entrepreneurs unleashed the astounding energies of steam and coal and the world was forever changed The emergence of factories railroads and gunboats propelled the West's rise to power in the nineteenth century and the development of computers and nuclear weapons in the twentieth century secured its global supremacy Now at the beginning of the twenty first century many worry that the emerging economic power of China and India spells the end of the West as a superpower In order to understand this possibility we need to look back in time Why has the West dominated the globe for the past two hundred years and will its power last Describing the patterns of human history the archaeologist and historian Ian Morris offers surprising new answers to both questions It is not he reveals differences of race or culture or even the strivings of great individuals that explain Western dominance It is the effects of geography on the everyday efforts of ordinary people as they deal with crises of resources disease migration and climate As geography and human ingenuity continue to interact the world will change in astonishing ways transforming Western rule in the process Deeply researched and brilliantly argued *Why the West Rules for Now* spans fifty thousand years of history and offers fresh insights on nearly every page The book brings together the latest findings across disciplines from ancient history to neuroscience not only to explain why the West came to rule the world but also to predict what the future will bring in the next hundred years

Why the West Rules - For Now Ian Morris, 2011-01-14 Why does the West rule In this magnum opus eminent Stanford polymath Ian Morris answers this provocative question drawing on 50 000 years of history archeology and the methods of social science to make sense of when how and why the paths of development differed in the East and West and what this portends for the 21st century There are two broad schools of thought on why the West rules Proponents of Long Term Lock In theories such as Jared Diamond suggest that from time immemorial some critical factor geography climate or culture perhaps made East and West unalterably different and determined that the industrial revolution would happen in the West and push it further ahead of the East But the East led the West between 500 and 1600 so this development can't have been inevitable and so proponents of Short Term Accident theories argue that Western rule was a temporary aberration that is now coming to an end with Japan China and India resuming their rightful places on the world stage However as the West led for 9 000 of the previous 10 000 years it wasn't just a temporary aberration So if we want to know why the West rules we need a whole new theory Ian Morris boldly entering the turf of Jared Diamond and Niall Ferguson provides the broader approach that is necessary combining the textual historian's focus on context the anthropological archaeologist's awareness of the deep past and the social scientist's comparative methods to make sense of the past present and future in a way no one has ever done before

Why the West Rules - for Now Ian Morris,2010 Why did British boats shoot their way up the Yangzi in 1842 rather than Chinese ones up the Thames Why do Easterners use English more than Europeans speak in Mandarin or Japanese To put it bluntly why does the West rule There are two schools of thought the Long Term Lock In theory suggesting some sort of inevitability and the Short Term Accident theory But both approaches have misunderstood the shape of history Ian Morris presents a startling new theory He explains with flair and authority why the paths of development differed in the East and West and analysing a vicious twist in trajectories just ahead of us predicts when the West's lead will come to an end Here you have three books wrapped into one an exciting novel that happens to be true an entertaining but thorough historical account of everything important that happened to any important people in the last 10 millennia and an educated guess about what will happen in the future Read learn and enjoy Jared Diamond A great work of synthesis and argument drawing together an awesome range of materials and authorities to bring us a fresh sharp reading of East West relationships Andrew Marr
