building greater innovative and adaptive capacity into their operations Accessible and full of practical examples the book argues that traditional business strategies which seek to systematise innovation and eliminate uncertainty need to be balanced with more flexible approaches which acknowledge and harness uncertainty The missing key to innovation it is argued is to turn serendipity into capability The author proposes a simple model which allows managers to tap into the increasingly dynamic and interconnected nature of the construction industry Innovation does not occur in isolation within individual firms but through collaboration Each stakeholder in the construction industry has a responsibility to drive innovation and this book will be key reading for consultants contractors subcontractors suppliers and clients as well as policy makers and all serious students of construction management
