Instrumental Methods Of Analysis Christine Jeyaseelan, Ravin M. Jugade, Sheenam Thatai, 2022-11-21 Instrumentation Techniques refer to the development of methods and tools used in applied physics materials science and nanotechnology for design synthesis manufacturing imaging or analytics for analytical chemists in special and all the material scientists in general They form a basis for qualitative description of as well as quantitative estimation of various types of materials samples reaction intermediates and final products The fundamental principles underlying these techniques instrumentation involved in it applications for routine analysis and current status of these techniques in research field have been covered in each chapter The authors have taken all the efforts to make the language and topics simple to understand for the UG as well as PG students

Analytical Methods in Chemical Analysis Shikha Kaushik, Banty Kumar, 2023-06-19 Analytical Chemistry is important and applied experimental field of science that employs different instruments and methods for the collection separation identification and quantification of various organic inorganic and biological molecules This interdisciplinary branch is based not only on chemistry but also on other disciplines such as biology physics pharmaceutical and many areas of technology The book is organized into six sections and provides information pertinent to the important techniques and methods employed in analytical chemistry It covers the basic concepts of qualitative and quantitative analysis spectrochemical methods of analysis along with thermal and electroanalytical methods Qualitative analysis identifies analytes while quantitative analysis determines the concentration or numerical amount of the molecules under study This book also exposes students to the different laws of spectroscopy and various electronic transitions that occur in the different regions of the electromagnetic spectra The main objective of this work is to develop an understanding and make learners familiar with the basic analytical methods employed in the chemical analysis of various compounds

Instrumental Methods of Chemical Analysis (analytical Chemistry) B. K. Sharma, 2000 *Textbook of Forensic Science* Pankaj Shrivastava, Jose Antonio Lorente, Ankit Srivastava, Ashish Badiye, Neeti Kapoor, 2023-10-28 This textbook provides essential and fundamental information to modern forensics investigations It discusses criminalistics and crime scene aspects including investigation management collecting and packaging various types of physical evidence forwarding and chain of custody It presents fundamental principles ethics challenges and criticism of forensic sciences and reviews the crime typologies the correlates of crime criminology penology and victimology It provides a viewpoint on legal aspects including types of evidence the procedure in the court and scrutiny of the evidence and experts The book summarizes forensic serological evidences such as blood semen saliva milk tears sweat vaginal fluids urine and sweat It also provides an overview of forensic examination of different types of evidence and also includes comprehensive detailing of forensic ballistics including firearm classification bullet comparison and matching Further it explores the examinations of drugs chemicals explosives and petroleum products It focuses on the various aspects of forensic toxicology including the study of various poisons toxins associated signs and

symptoms a fatal dose fatal period of poisons The book also emphasizes digital and cyber forensics including classification data recovery tools encryption and decryption methods image and video forensics It is a useful resource for graduate and post graduate students in the field of Forensic Science

Colorimetry Ashis Kumar Samanta,2022-07-20 This book presents a comprehensive overview of colorimetry and colorimetric analysis of dyes pigments paints pharmaceuticals and other products via spectrophotometric and spectroscopic analysis Chapters address such topics as UV VIS spectroscopy reflectance spectral analysis of colours colour science in the paint industry colouration of textiles for defence applications and much more

Characterization of Nanoencapsulated Food Ingredients ,2020-03-07 Characterization of Nanoencapsulated Food Ingredients Volume Four in the Nanoencapsulation in the Food Industry series introduces some of the common instrumental analysis and characterization methods for the evaluation of nanocarriers and nanoencapsulated ingredients in terms of their morphology size distribution surface charge and composition appearance physicochemical and rheological properties and antioxidant activity Divided in five sections the book covers the qualitative and quantitative properties of nanoencapsulated food ingredients by different characterization techniques besides correlating nanocarrier behavior to their physicochemical and functional properties Authored by a team of global experts in the fields of nano and microencapsulation of food nutraceutical and pharmaceutical ingredients this title is of great value to those engaged in the various fields of nanoencapsulation and nanodelivery systems Shows how different properties of nanoencapsulated food ingredients can be analyzed Presents the mechanism of each characterization technique Investigates how the analytical results can be understood with nanoencapsulated ingredients
