about to change again As governments and billionaires aim to turn a profit from its resources Rebecca Boyle shows us that the Moon belongs to everybody and nobody at all *Springer Handbook of Spacetime* Abhay Ashtekar, Vesselin Petkov, 2014-09-01 The Springer Handbook of Spacetime is dedicated to the ground breaking paradigm shifts embodied in the two relativity theories and describes in detail the profound reshaping of physical sciences they ushered in It includes in a single volume chapters on foundations on the underlying mathematics on physical and astrophysical implications experimental evidence and cosmological predictions as well as chapters on efforts to unify general relativity and quantum physics The Handbook can be used as a desk reference by researchers in a wide variety of fields not only by specialists in relativity but also by researchers in related areas that either grew out of or are deeply influenced by the two relativity theories cosmology astronomy and astrophysics high energy physics quantum field theory mathematics and philosophy of science It should also serve as a valuable resource for graduate students and young researchers entering these areas and for instructors who teach courses on these subjects The Handbook is divided into six parts Part A Introduction to Spacetime Structure Part B Foundational Issues Part C Spacetime Structure and Mathematics Part D Confronting Relativity theories with observations Part E General relativity and the universe Part F Spacetime beyond Einstein *Visualising Skyscapes* Liz Henty, Daniel Brown, 2019-08-19 Above the land and its horizon lies the celestial sphere that great dome of the sky which governs light and darkness critical to life itself yet its influence is often neglected in the archaeological narrative Visualising Skyscapes captures a growing interest in the emerging field of skyscape archaeology This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam its contents have a wide reaching relevance for the fields of archaeology anthropology ethnography archaeoastronomy astronomy heritage and cultural studies The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world Visualising Skyscapes captures the growing interest in the multidisciplinary study of skylines and will be of interest to academics students and the general public as well as having international appeal It is topical timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images *Amateur Astronomer's Handbook* John Benson Sidgwick, 1980 Om teleskoper og brugen deraf optiske instrumenter m linger med mere **International Books in Print** ,1990 **Handbook of Gravitational Wave Astronomy** Cosimo Bambi, Stavros Katsanevas, Konstantinos D.
