

## **AUTOBIOGRAPHY OF A BANYAN TREE**

I am a banyan tree. My abode is a small town. It's developing fast. I am just twenty. You may term me youth. These days' banyan trees hardly survive for seventy to eighty years. I am telling about the life-span for my variety. We have three types based on place of growing, viz. rural, suburban and metropolitan.

The rural banyan trees are also termed as classical type. They are on the verge of extinction. Their average life-span is four-hundred years. In the countryside, assemblage for market, meeting, musical orchestra, drama, etc. takes place beneath their shadow. You will find their reference in the classics of prolific story-tellers Bankim Chandra, Tarashankar, Prabhatkumar, Sarat Chandra and the like.

I belong to town category. Before I narrate my bringing up, let me add a few words on our life struggle. We live in small town or suburban. Our births generally take place in disputed places. It may be due to human touch or natural reasons. Thus, very often you will find germination of our seeds at places like the cracks of old buildings, decomposed portion or holes in trees, heaps of garbage, etc. It's needless to mention that we face turbulent and uncertain periods in our childhood. Sometimes, people become ruthless upon us. They don't hesitate to uproot. Beheading is a common onslaught. Especially, it's unleashed upon us with fanfare on the eve of Durga Puja. Thus, it's difficult for us to grow by the side of streets in the town. There is no scope for extending roots underneath as well. The workers of Drinking Water Supply Department do not hesitate to cut our roots on the plea of laying pipes. The onslaughts from other departments like PWD, BSNL, TNGC, etc just add insult to the injuries. Sometimes, activists styled as environmentalists do cry for our save. But, it's showy; they are biased towards metropolitan sect.

But, there is always an element of natural selection. At times, the Nature favours us to grow even in rocky soils. My comrades feel it lucky if a stone underneath comes out due to exposure in weather. The
