**Iron Trade Review and Western Machinist**, 1926      **Metal Casting: Theory and Practice** Jagadeesha T, 2019-12-28 Casting is one of the most commonly used manufacturing processes in industries It is almost impossible to make a product like automobile aircraft etc without cast component This book is meant to serve as a bridge between the study of the processes and their applications in production industries Compared with the classical method of writing a book two similar fundamental processes namely theory and practice are blended and explained so that the reader gets holistic approach to casting First basic processes are discussed followed by the special processes and design of systems is discussed It is a comprehensive source of technical metal casting information that foundry engineers and managers process engineers and anyone who has interest in or needs to know about foundry operations and products Book comes as a useful resource for Mechanical Engineering students It also includes industry data foundry practices real time industrial applications and problems      *The Review*, 1915      **Iron Trade Review**, 1926      **Iron Trade Review**, 1921      **The Shop Review**, 1916

**Sustainable Challenges and Smart Practices in Engineering, Technology & Management** Dr. Gayatri S. Ambadkar, 2022-10-17 Today CCTV only acts as evidence and is in effect as the illegal work is already done In such cases Abandoned Object Detection AOD has been used to monitor places in a real time environment Detection of abandoned objects from real time video surveillance has many applications from avoiding the bomb blasts vehicle tracking to hospital monitoring It could even detect illegally parked vehicles in sensitive areas Main aim of this paperwork is to detect foreground objects in real time video surveillance which are static and were previously moving Once static objects are verified or detected we will classify them into human and nonhuman objects We will consider nonhuman objects as abandoned objects After detection if the object remains still for a particular time alert message will be sent to security or the nearest police station Such a system proves to be efficient in public places for providing security Lot of work is carried out in a single stationary camera We intend to perform abundant object detection using multiple cameras captured from different cameras
