## **Citizen Journalism:**

*Citizen Journalism* Melissa Wall, 2012 Using digital tools such as YouTube and Twitter ordinary people are collecting and sharing news that might otherwise never get reported What does this trend mean for professional journalism and ultimately for democracy The chapters include examples of citizen journalism from Britain Burma Canada Iran Kenya Palestine Taiwan and the United States

**International Handbook of Internet Research** Jeremy Hunsinger, Lisbeth Klastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation

**Citizen Journalism** Melissa Wall, 2018-12-20 Citizen Journalism explores citizen participation in the news as an evolving disruptive practice in digital journalism This volume moves beyond the debates over the mainstream news media attempts to control and contain citizen journalism to focus attention in a different direction the peripheries of traditional journalism Here more independent forms of citizen journalism enabled by social media are creating their own forms of news Among the actors at the boundaries of the professional journalism field the book identifies are the engaged citizen journalist and the enraged citizen journalist The former consists of underrepresented voices leading social justice movements while the latter reflects the views of conservatives and the alt right who often view citizen journalism as a performance Citizen Journalism further explores how non journalism arenas such as citizen science enable ordinary citizens to collect data and become protectors of the environment Citizen Journalism serves as an important reminder of the professional field's failure to effectively respond to the changing nature of public communication These changes have helped to create new spaces for new actors in such places traditional as well as upstart forms of journalism negotiate and compete ultimately aiding the journalism field in creating its future

**Media Law, Ethics, and Policy in the Digital Age** Mhiripiri, Nhamo A., Chari, Tendai, 2017-01-10

The growing presence of digital technologies has caused significant changes in the protection of digital rights. With the ubiquity of these modern technologies, there is an increasing need for advanced media and rights protection. *Media Law, Ethics, and Policy in the Digital Age* is a key resource on the challenges, opportunities, issues, controversies, and contradictions of digital technologies in relation to media law and ethics, and examines occurrences in different socio-political and economic realities. Highlighting multidisciplinary studies on cybercrime, invasion of privacy, and muckraking, this publication is an ideal reference source for policymakers, academicians, researchers, advanced level students, government officials, and active media practitioners.

**Notions of Community** Janey Gordon, 2009. This volume gets beyond simple descriptions of the values and processes involved in community media and is deliberately seeking argument and structured debate around the issues of this vibrant sector of the media. The contributors examine the dilemmas that have emerged within this sector and provide an incisive overview. The chapters use case studies and data research to illustrate the major debates facing community media, along with a sideways look at the dilemmas that community media practitioners and their audiences must engage with. This collection provides an international perspective and covers the traditional formats as well as newer media technologies. It also gives some intriguing examples of community media which get beyond simple good practices.

*Active Media Technology* Jiming Liu, Jinglong Wu, Yiyu Y. Yao, Toyooki Nishida, 2009-10-05. This book constitutes the refereed proceedings of the 5th International Conference on Active Media Technology (AMT 2009) held in Beijing, China, in October 2009. The 47 revised full papers and the 6 keynote talks were carefully reviewed and selected. The papers reflect the shared forum for researchers and practitioners from diverse fields such as computer science, information technology, artificial intelligence, media engineering, economics, data mining, data and knowledge engineering, intelligent agent technology, human-computer interaction, complex systems, and systems science. The book offers new insights into the main research challenges and development of AMT by revealing the interplay between the studies of human informatics and research of informatics on the Web, Internet, mobile, and wireless-centric intelligent information processing systems.

**Public Journalism 2.0** Jack Rosenberry, Burton St John, 2009-12-16. Where does journalism fit in the media landscape of blogs, tweets, Facebook postings, YouTube videos, and literally billions of Web pages? *Public Journalism 2.0* examines the ways that civic or public journalism is evolving, especially as audience-created content, sometimes referred to as citizen journalism or participatory journalism, becomes increasingly prominent in contemporary media. As the contributors to this edited volume demonstrate, the mere use of digital technologies is not the fundamental challenge of a new citizen-engaged journalism; rather, a deeper understanding of how civic/public journalism can inform citizen-propelled initiatives is required. Through a mix of original research, essays, interviews, and case studies, this collection establishes how public journalism principles and practices offer journalists, scholars, and citizens insights into how digital technology and other contemporary practices can increase civic engagement and improve public life. Each chapter concludes with pedagogical features, including Theoretical Implications, highlighting the

main theoretical lessons from each chapter Practical Implications applying the chapter s theoretical findings to the practice of citizen engaged jouranlis Reflection Questions prompting the reader to consider how to extend the theory and application of the chapter blogging and other participatory journalism practices enabled by digital technology are not always in line with the original vision of public journalism which strives to report news in such a way as to promote civic engagement by its audience Public Journalism 2 0 seeks to reinvent public journalism for the 21st century and to offer visions of how digital technology can be enlisted to promote civic involvement in the news
