

Fig. 2.2 Pushing the wall, no work is being done

Similarly, a coolie does no work while standing with a heavy load on his head (although he feels tired), since the displacement of load is zero.

## 2.2 MEASUREMENT OF WORK

If forces  $F_1$  and  $F_2$  (where  $F_1 > F_2$ ) move two different bodies by the same distance, the work done by the force  $F_1$  is said to be more than that by the force  $F_2$ . Similarly, if a force  $F$  moves the bodies 1 and 2 by distances  $S_1$  and  $S_2$  respectively (where  $S_1 > S_2$ ), the work done by the force  $F$  on body 1 is said to be more than on body 2. Thus the amount of work done depends on both factors : the magnitude of the force applied, and the magnitude of the displacement.

*The amount of work done by a force is equal to the product of the force and the displacement of the point of application of the force in the direction of force.*

I.e., Work = Force  $\times$  displacement of the point of application of force in the direction of force

Fig. 2.3 Work done by a force

In Fig. 2.3, suppose a constant force  $F$  displaces a body from position A to position B along its own direction. Then the displacement of the body is AB ( $= S$ ), and the work done is

$$W = F \times S \quad \dots(2.1)^*$$

\* In eqn. (2.1), the sign " $\times$ " means simple multiplication of two scalars  $F$  and  $S$  which are the magnitudes of force and displacement respectively. It does not mean the cross or vector product of two vectors  $\vec{F}$  and  $\vec{S}$ .

Here we assume that the force does not change during the displacement and it acts throughout the displacement.

In eqn. (2.1), if  $S = 0$ , then  $W = 0$ . Thus

*If a force acts on a body and the body does not move i.e., displacement is zero, then no work is done.*

Work is a scalar quantity.

### Expression of work ( $W = FS \cos \theta$ )

It is not necessary that the force always causes the displacement of the body in its own direction. If under some circumstances, a force displaces the body in a direction other than the direction of force, then we can determine the amount of work done by the force in two ways : (1) by finding the component of displacement of the body in the direction of force, and (2) by finding the component of force in the direction of displacement.

- (1) **By finding the component of displacement along the force :** In Fig. 2.4, suppose a constant force  $F$  acts on a body along AB and displaces the body on an inclined surface from A to C. The displacement of the body is  $AC = S$ , which is at an angle  $\theta$  to the direction of force. To find the component of displacement in the direction of force (i.e., along AB), a perpendicular CB is drawn from the point C on AB. Then the component of displacement in the direction of force is AB.

Fig. 2.4 Work done by a force when the displacement is not along the force by taking the component of displacement along the force

Hence, work done  $W = F \times AB$

### **Class 10 Icse Guided Physics Work All Experiment Observation Introduction**

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Class 10 Icse Guided Physics Work All Experiment Observation PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek.
