Management Principles A Contemporary Edition For Africa:

Management Principles P. J. Smit, 2007 Book CD To improve on an award winning book poses a major challenge to its authors The authors of this book took the challenge head on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa and the rest of Africa The findings of this study which dealt with current and near future management issues as well as classical and contemporary thinking about management were used as the blueprint for the updating of this book After placing management in context the authors deal with the knowledge skills and dispositions required of managers to perform the management functions of planning organising leading and controlling in a volatile business world Examples of how the functions are applied in practice are cited throughout the book These examples refer mainly to South African organisations and situations that managers in South Africa and Africa have to deal with to create and sustain a competitive advantage for their organisations The book endeavours to break down the silo effect of seeing the management functions as separate activities This is done by continuously placing the management function at hand in a bigger context This enables learners of management to assess the implications of management decisions on different people processes systems and so on that make up the organisation

Mysteries of Africa's Underdevelopment W. Forje, 2020-05-19 Unravelling the mysteries of Africa's underdevelopment presents an Afrocentric ideological understanding of the continent's fragmentation, a scientific and objective Mijadala discourse as well as an approach of how to move progressively and sustainably Africa forward. The breadth and depth of the book shows the unwavering impoverishment and urgent need for the continent to stand up and take the bull by the horn. It offers an inspiring means of grappling with the continent's problems to build the change we want. An African Wealth of Nations, not the continent of collapsed failed states under the governance construct of centralised authoritarian regimes. It is a thought-provoking discourse that challenges us all to be inherent participants in the reconstruction of a Brave New Africa far beyond the 21st Century.
