10TH EDITION

CHAPTER 1: TEN PRINCIPLES OF ECONOMICS

SOLUTIONS TO TEXT PROBLEMS

The following are solutions to the problems within the text.

QUESTIONS FOR REVIEW

1. Examples of trade-offs include time trade-offs (such as studying one subject over another or studying at all compared to engaging in social activities) and spending trade-offs (such as whether to use your last 15 dollars to purchase a pizza or to buy a study guide for that tough economics course).
2. To figure out the opportunity cost of a vacation to an amusement park, you would include the monetary costs of: admission, travel, souvenirs. You would also include the cost of time spent on vacation. The time cost depends on your next best use of that time; if it is staying home and watching TV, the time cost may be small, but if it is working extra hours at your job, the time cost is the money you could have earned. You would NOT include the costs of food and lodging unless they exceeded the costs you would have incurred had you not gone on vacation. In that case, you would only include the additional costs, not the total costs of food and lodging.
3. The marginal benefit of a glass of water depends on your circumstances. If you have just run a marathon or you have been walking in the desert sun for three hours, the marginal benefit is very high. But if you have been drinking a lot of liquids recently, the marginal benefit is quite low. The point is that even the necessities of life, like water, do not always have large marginal benefits.
4. Policymakers need to think about incentives so they can understand how people will respond to the policies they put in place. The text's example of seat belt laws shows that policy actions can have unintended consequences. If incentives matter a lot, they may lead

Macro/Micro 2e Canadian N. Gregory Mankiw,2002-02 **EBOOK: Advanced Macroeconomics** ROMER,2018-02-22 **EBOOK Advanced Macroeconomics** A Primer on Macroeconomics (portrait view) George A. Waters, This book bridges the gap between undergraduate textbooks using graphs and graduate level texts that focus on a single theoretical framework The text presents a range of models and connects them to current policy issues and empirical results The field of macroeconomics has made great strides but it is far from a finished product See the website for more information <https://primeronmacro.blogspot.com> Unemployment: Past and Present Philip Arestis,John McCombie,2009 Providing an overview of the debates which have surrounded employment in the world of economics this title includes contributions from many experts in the areas of unemployment and macroeconomics *The Need for Humility in Policymaking* Stefanie Haefele,Anne Hobson,2019-08-22 Regulations impact a wide array of market and social activities that influence our daily lives Regulations are attempts to correct perceived market failures caused by information asymmetries externalities and principal agent problems and to provide public goods which would otherwise be underprovided Government actors are responsible for identifying these issues weighing the costs and benefits of intervention and designing and implementing regulations to improve society Good regulations help mitigate issues in the economy without inciting new problems and without the costs exceeding the benefits of intervention This requires intensive analysis and an awareness of the complexities

of social life Our society is complex and dynamic where people face knowledge and incentive problems whether in the market politics or civil society By examining this complex reality we can better understand why regulations arise and persist and the challenges of reform We argue that this approach to policymaking and policy analysis requires humility an acknowledgment of the challenges we face when intervening in our society This volume intends to cultivate an appreciation for the complexity of human decision making and the incentives that drive human behavior By examining specific policy changes it will delve into the effects of and lessons learned from regulations in financial markets computer and internet governance and health care innovation and delivery This volume will be of interest to students scholars and policymakers who seek to understand the complexities of regulation in a dynamic social world
