## **Principles Learning Behavior Michael Domjan:**

*The Principles of Learning and Behavior* Michael Domjan, 1998 Domjan's book provides a comprehensive and systematic introduction to elementary forms of learning that have been the focus of research for much of the twentieth century. The book covers habituation, classical conditioning, instrumental conditioning, stimulus control, aversive control, and their applications to the study of cognition and to the alleviation of behavior problems. Biological constraints on learning are integrated throughout the text, as are applications boxes that relate animal research to human learning and behavior. The book closely reflects the field of research it represents in terms of topics covered, theories discussed, and experimental paradigms described.

*The Principles of Learning and Behavior* Michael Domjan, 2006 This active learning edition includes a new built-in workbook that provides examples and exercises to help students practice and remember what they read in the text. In addition, students read graphs and make their own interpretations of what the information yields about behavior. Each exercise begins with a short lesson and then has short assignments that range from 1 minute to 30 minutes worth of work. Some are short answer, some are projects, and some are more involved. The workbook also incorporates students' exercises for SNIFFY THE VIRTUAL RAT VERSION 2.0. Known for its currency and clear writing style, *PRINCIPLES OF LEARNING AND BEHAVIOR* provides a comprehensive and systematic introduction to elementary forms of learning that have been the focus of research for much of the twentieth century. The book covers habituation, classical conditioning, instrumental conditioning, stimulus control, aversive control, and their applications to the study of cognition and to the alleviation of behavior problems. Biological constraints on learning are integrated throughout the text, as are applications boxes that relate animal research to human learning and behavior. The book closely reflects the field of research it represents in terms of topics covered, theories discussed, and experimental paradigms described.

*The Principles of Learning & Behavior* Michael Domjan, Barbara Burkhard, 1986 This popular text gives students a comprehensive and readable introduction to contemporary issues in learning and behavior while providing balanced coverage of classical and instrumental conditioning.

*Domjan and Burkhard's The Principles of Learning and Behavior* Michael Domjan, Barbara Burkhard, 1993 This popular text gives students a comprehensive and readable introduction to contemporary issues in learning and behavior. The book's balanced coverage, careful organization, and focus on animal learning have made it a favorite for years with professors and students alike. The book provides a systematic introduction to elementary forms of learning that have been the focus of research for much of the twentieth century: habituation, classical conditioning, instrumental conditioning, stimulus control, aversive control, and their applications to the study of cognition and to the alleviation of behavior problems. Biological constraints on learning are integrated throughout the text, as are applications boxes that relate animal research to human learning and behavior. The book is organized so that each chapter builds on the previous one, and simpler phenomena (habituation and sensitization) are described before more complicated ones. Within each chapter, information is also presented in increasing order of complexity.
