The Principles of Alternative Investments Management Ewelina

Sokołowska, 2015-06-24 The purpose of this book is to present the principles of alternative investments in management. The individual chapters provide a detailed analysis of various classes of alternative investments on the financial market. Despite many different definitions of alternative investments, it can be assumed that a classical approach to alternative investments includes hedge funds, fund of funds (FOF), managed accounts, structured products, and private equity venture capital. Alternative investment, in keeping with this broad definition, is the subject of consideration here. The theoretical part of each chapter is meant to collect, systematize, and deepen readers' understanding of a given investment category, while the practical part of each focuses on an analysis of the current state of development of alternative investments on the global market and outlines the prospects of future market development. This book will be a valuable tool for scholars, practitioners, and policy makers alike.
