Case Study Houses The Complete Csh Program 1945 1966:

Case Study Houses Elizabeth A. T. Smith, 2019 Le programme Case Study House représente un vnement sans précédent dans l'histoire de l'architecture américaine. Chantre du modernisme, John Entenza en fut la force motrice et appela certains des plus grands noms de l'architecture dont Richard Neutra, Charles et Ray Eames ou Eero Saarinen y participer. Cette rétrospective célèbre chacun des 36 prototypes de maison travers une documentation complète agrémentée de plans, croquis et photos.

Case Study Houses Elizabeth A. T. Smith, 2016-02-15 With 36 prototype designs the Case Study House program created paradigms for modern living that would extend their influence far beyond their Los Angeles heartland. This essential introduction features 150 photographs and plans to explore each of these model residences and their architects including Richard Neutra, Charles and Ray Eames and Eero Saarinen.

Case Study Houses Elizabeth A. T. Smith, Shannon Loughrey, Peter Loughrey, 2016 *J. R. Davidson* Lilian Pfaff, 2019-09-02 Julius Ralph Davidson is widely known as the architect of Thomas Mann's house. Born 1889 in Berlin, Davidson left Germany in 1923 and emigrated to the USA. In Los Angeles he designed some 150 projects among them three houses for the experimental Case Study House Program. This long overdue publication is a comprehensive documentation of Davidson's life and work highlighting J. R.'s contribution to modernism in California in the 1930s and 1940s.

Aesthetics and Design Jeffrey Petts, 2023-11-02 What designers do and how we all as users of designed things live with their products raises fundamental philosophical questions about how we should live and how the nature of design work and good design relates to our lives. Jeffrey Petts presents a holistic and pragmatist approach to the philosophy of design. Acknowledging the importance of function in design without downplaying the aesthetic dimension, Petts relates the manner of evaluating design to the designing process itself as demonstrated in the work of, for example, William Morris, Walter Gropius and Bauhaus, Charles and Ray Eames and Dieter Rams. This metacritical and everyday approach to the philosophy of design expresses a commitment to real aesthetics connecting concrete issues in both practice and experience to philosophical ideas and reveals the role aesthetics plays in considerations about the good life.

Alexander Girard, Architect Deborah Lubera Kawsy, 2018-06-18 Showcases the bold, innovative and colorful architectural designs of Alexander Girard. During the midcentury period, Michigan attracted visionary architects, designers and theorists including Alexander Girard. While much has been written about Girard's vibrantly colored and patterned textiles for Herman Miller, the story of his Detroit period, 1937-53 encompassing interior and industrial design, exhibition curation and residential architecture has not been told. *Alexander Girard Architect: Creating Midcentury Modern Masterpieces* by Deborah Lubera Kawsy is the first comprehensive study of Girard's exceptional architectural projects, specifically those concentrated in the ultra-traditional Detroit suburb of Grosse Pointe. One exciting element of the book is the rediscovery of another Girard masterpiece, the only surviving house designed entirely by Girard and former residence to Mr. and Mrs. John McLucas. Restored in consultation with iconic midcentury designer Ruth Adler Schnee, the McLucas house represents the culmination

of Girard's Detroit design work at midcentury. Stunning color photographs capture the unique design elements including the boldly colored glazed brick walls of the atrium reminiscent of Girard's role as color consultant for the GM Tech Center. Original Girard drawings for the building plan, interior spaces, and custom designed furniture document the mind of a modernist master at work and are made available to the public for the first time in this beautiful book.

Alexander Girard Architect is a beautiful informative book suited for enthusiasts of Alexander Girard, the midcentury modern aesthetic, and Detroit history, art, and architecture.

Nothing Permanent Todd Cronan, 2023-06-20. A critical look at the competing motivations behind one of modern architecture's most widely known and misunderstood movements. Although mid-century modern has evolved into a highly popular and ubiquitous architectural style, this term obscures the varied perspectives and approaches of its original practitioners. In *Nothing Permanent*, Todd Cronan displaces generalizations with a nuanced intellectual history of architectural innovation in California between 1920 and 1970, uncovering the conflicting intentions that would go on to reshape the future of American domestic life. Focusing on four primary figures: R. M. Schindler, Richard Neutra, and Charles and Ray Eames, *Nothing Permanent* demonstrates how this prolific era of modern architecture in California, rather than constituting a homogenous movement, was propelled by disparate approaches and aims. Exemplified by the twin pillars of Schindler and Neutra and their respective ideological factions, these two groups of architects represent opposing poles of architectural intentionality, embodying divergent views about the dynamic between interior and exterior, the idea of permanence, and the extent to which architects could exercise control over the inhabitants of their structures. Looking past California modernism's surface-level idealization in present-day style guides, home decor publications, films, and television shows, *Nothing Permanent* details the intellectual, aesthetic, and practical debates that lie at the roots of this complex architectural moment. Extracting this period from its diffusion into visual culture, Cronan argues that mid-century architecture in California raised questions about the meaning of architecture and design that remain urgent today.

The case study house program Because most opinion both profound and light headed in terms of post war housing is nothing but speculation in the form of talk and reams of paper it occurs to us that it might be a good idea to get down to cases and at least make a beginning in the gathering of that mass of material that must eventually result in what we know as house post war Agreeing that the whole matter is surrounded by conditions over which few of us have any control certainly we can develop a point of view and do some organized thinking which might come to a practical end It is with that in mind that we now announce the project we have called The Case Study House Program The magazine has undertaken to supply an answer insofar as it is possible to correlate the facts and point them in the direction of an end result We are within the limits of uncontrollable factors proposing to begin immediately the study planning actual design and construction of eight houses each to fulfil the specifications of a special living problem in the Southern California area Eight nationally known architects chosen not only for their obvious talents but for their ability to evaluate realistically housing in terms of need have been commissioned to take a plot of God s green earth and create good living conditions for eight American families They will be free to choose or reject on a merit basis the products of national manufacturers offering either old or new materials considered best for the purpose by each architect in his attempt to create contemporary dwelling units We are quite aware that the meaning of contemporary changes by the minute and it is conceivable that each architect might wish to change his idea or a part of his idea when time for actual building arrives In that case he will within reason be permitted to do so Incidentally the eight men have been chosen for among other things reasonableness which they have consistently maintained at a very high level

Imagining Modernity Anoma Pieris, Social Scientists Association of Sri Lanka, 2007 This book is a detailed study of the architecture of Valentine Gunasekara 1931 2017 It provides an innovative lens to understand the formation of a Ceylonese middle class which was inspired by the post independence desire for modernity Their experiments values and dynamic social history are the framework for this research Although neglected by his peers and marginalized by the prevalent discourse on vernacular regionalism Gunasekara s work poses important questions regarding the utopian ideals of the modernist project and its successes and its failures in Asia More significantly his work reveals the European and American influences that shaped the first generation of Ceylonese architects and their efforts at adapting new materials and technologies to a very different climate and culture This book documents a wide range of Gunasekara s projects including residential religious and commercial buildings arguing that they represented a nascent cosmopolitanism from below that proved to be quite antithetical to regionalist trends in architecture This e book is a republication of an earlier edition published by Stamford Lake in 2007
