Public Sector Information in the Digital Age Georg Aichholzer, Herbert Burkert, 2004 This timely volume reviews key issues and developments in the controversial area of public sector information PSI It addresses the fundamental themes challenges and conflicts surrounding the access to and use of PSI in the new digital era Using detailed empirical analyses and case studies from across Europe and the USA the authors focus on the crucial policy economic legal and social issues

This is one of the first books devoted to addressing the new challenges of access to PSI and the role of public policy. The international contributors including leading experts from Europe and the US have produced an informative and coherent resource that will be of interest to scholars, students and decision makers working in the fields of public policy, economics, political science, law and information technology. Jacket [Water-Energy-Food Nexus](#) P. Abdul Salam, Sangam Shrestha, Vishnu Prasad Pandey, Anil Kumar Anal, 2017-07-12. Water, energy and food are key resources to sustain life and are fundamental to national, regional and global economies. These three resources are interlinked in multiple ways and the term nexus captures the interconnections. The nexus has been discussed, debated, researched and advocated widely but the focus is often on the pairings of water-energy or water-food or energy-food. To really benefit from the nexus approach in terms of resource use efficiency, it is essential to understand, operationalize and practice the nexus of all three resources. As demand for these resources increases worldwide, using them sustainably is a critical concern for scientists and citizens, governments and policy makers. Volume highlights include: Contributions to the global debate on water-energy-food nexus; Examples of the nexus approach in practice from different regions of the world; Perspectives on the future of the nexus agenda; [Water-Energy-Food Nexus: Theories and Practices](#) is a valuable resource for students, researchers, scholars and professionals in academic institutions with strong interests in interdisciplinary research involving geography, earth science, environmental science, environmental management, sustainability science, international development and ecological economics. The volume will also be useful for professionals, practitioners and consultants in NGOs, government and international agencies.
