High-Density Housing Christian Schittich, 2012-12-17 In view of the growing number of diverse life styles the search for flexible adaptable floor plans has become a fundamental issue in residential building That the continued demand in urban centres can only be responsibly satisfied by high density housing is undisputed More than ever before building high density housing is a diverse and challenging task for planners and architects This book presents international projects which document the complexity of the task from the design of the floor plans the development and use of resources to the use of economically beneficial building systems The high quality of the architecture and construction in such residential areas can be clearly seen in the uniform illustrations of the floor plans and large scale drawings of details The introductory contributions discuss extensively the topic of floor plan design and development This book is a comprehensive review of the current state of residential building the perspectives and future developments *Sustainable Energy Landscapes* Sven

Stremke, Andy van den Dobbelsteen, 2012-09-12 In the near future the appearance and spatial organization of urban and rural landscapes will be strongly influenced by the generation of renewable energy One of the critical tasks will be the re integration of these sustainable energy landscapes into the existing environment which people value and want to preserve in a socially fair environmentally sound and economically feasible manner Accordingly *Sustainable Energy Landscapes* Designing Planning and Development focuses on the municipal and regional scale where energy conscious interventions are effective and stakeholders can participate actively in the transition process This book presents state of the art knowledge in the exciting new field of sustainable energy landscapes It bridges the gap between theory and fundamental research on the one hand and practice and education on the other The chapters written by experts in their fields present a selection of interdisciplinary cutting edge projects from across the world illustrating the inspiring challenge of developing sustainable energy landscapes They include unique case studies from Germany Taiwan the United Kingdom Canada Denmark Austria Italy and the United States The editors and team of contributing authors aim to inspire readers providing a comprehensive overview of sustainable energy landscapes including principles concepts theories and examples The book describes various methods such as energy potential mapping and heat mapping multicriteria decision analysis energy landscape visualization and employing exergy and carbon models It addresses how to quantify the impact of energy transition both on landscape quality and energy economy issues of growing importance The text infuses readers with enthusiasm to promote further research and action toward the important goal of building energy landscapes for a sustainable future **The Urbanisation**

of the Sea Nancy Couling, Carola Hein, 2020-12-02 The book tells the story of the sea land continuum based on the case of the North Sea one of the world s most industrialised seas in which the Netherlands plays a central role The space of the North Sea is almost fully planned and has been loaded with the task of increased economic production from new and traditional maritime sectors At the same time it has been emptied of cultural significance Through diverse projects from

academia art literature and practice from analysis to design the book explores synergies for designing this new spatial realm

Port city expert Carola Hein professor of the history of architecture urban planning at Delft University of Technology and Nancy Couling associate professor at the Bergen School of Architecture and researcher of the urbanised sea combine forces with interdisciplinary experts to guide the reader through this complex and fascinating topic *Bibliographic Guide to Maps and Atlases 1996* G K HALL, G.
