Coupling in Mixed-Signal ICs X. Aragonés, J.L. González, Antonio Rubio, 2013-03-09 Modern microelectronic design is characterized by the integration of full systems on a single die These systems often include large high performance digital circuitry high resolution analog parts high driving I O and maybe RF sections Designers of such systems are constantly faced with the challenge to achieve compatibility in electrical characteristics of every section some circuitry presents fast transients and large consumption spikes whereas others require quiet environments to achieve resolutions well beyond millivolts Coupling between those sections is usually unavoidable since the entire system shares the same silicon substrate

bulk and the same package Understanding the way coupling is produced and knowing methods to isolate coupled circuitry and how to apply every method is then mandatory knowledge for every IC designer Analysis and Solutions for Switching Noise Coupling in Mixed Signal ICs is an in depth look at coupling through the common silicon substrate and noise at the power supply lines It explains the elementary knowledge needed to understand these phenomena and presents a review of previous works and new research results The aim is to provide an understanding of the reasons for these particular ways of coupling review and suggest solutions to noise coupling and provide criteria to apply noise reduction Analysis and Solutions for Switching Noise Coupling in Mixed Signal ICs is an ideal book both as introductory material to noise coupling problems in mixed signal ICs and for more advanced designers facing this problem

Low Voltage, Low Power VLSI Subsystems Kiat Seng Yeo, Kaushik Roy, 2005 Designers developing the low voltage low power chips that enable small portable devices face a very particular set of challenges This monograph details design techniques for the low power circuitry required by the many miniaturized business and consumer products driving the electronics market

Proceedings of the 2025 2nd International Conference on Electrical Engineering and Intelligent Control (EEIC 2025) Ata Jahangir Moshayedi, 2025-11-20 This is an open access book The organizing committee is honored to extend a heartfelt welcome to the 2nd International Conference on Electrical Engineering and Intelligent Control EEIC 2025 Building on the resounding success of its inaugural edition in Singapore 2024 as part of the Conference on Intelligent Collaboration CIC series this year s conference will convene in Auckland New Zealand reaffirming its role as a global nexus uniting leading researchers scholars and industry pioneers in electrical engineering and intelligent control Auckland s dynamic fusion of world class academia a thriving innovation ecosystem and a steadfast commitment to sustainability mirrors EEIC s vision for Collaborative Intelligence Ethical Innovation and Resilient Systems By hosting EEIC 2025 here we aim to harness the city s unique energy to address emerging challenges and drive technological progress with ethical foresight Under this guiding theme EEIC 2025 will catalyze cutting edge dialogue showcase transformative advancements and inspire collaborative solutions to shape the future of intelligent systems Through fostering synergy across disciplines we aspire to accelerate breakthroughs in both theoretical frameworks and real world applications ensuring resilient and equitable progress in these critical fields

High Performance Dynamic Circuits Ge Yang, 2003 *Power Aware Computing* Robert Graybill, Rami Melhem, 2013-04-17 With the advent of portable and autonomous computing systems power consumption has emerged as a focal point in many research projects commercial systems and DoD platforms One current research initiative which drew much attention to this area is the Power Aware Computing and Communications PAC C program sponsored by DARPA Many of the chapters in this book include results from work that have been supported by the PACIC program The performance of computer systems has been tremendously improving while the size and weight of such systems has been constantly shrinking The capacities of batteries relative to their sizes and weights has been also improving but at a rate which is much slower

than the rate of improvement in computer performance and the rate of shrinking in computer sizes The relation between the power consumption of a computer system and its performance and size is a complex one which is very much dependent on the specific system and the technology used to build that system We do not need a complex argument however to be convinced that energy and power which is the rate of energy consumption are becoming critical components in computer systems in general and portable and autonomous systems in particular Most of the early research on power consumption in computer systems addressed the issue of minimizing power in a given platform which usually translates into minimizing energy consumption and thus longer battery life

Field Programmable Logic and Applications Patrick Lysaght, James Irvine, Reiner Hartenstein, 2004-06-22 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications FPL 99 hosted by the University of Strathclyde in Glasgow Scotland August 30 September 1 1999 FPL 99 is the ninth in the series of annual FPL workshops The FPL 99 programme committee has been fortunate to have received a large number of high quality papers addressing a wide range of topics From these 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions A total of 65 papers from 20 countries are included in this volume FPL is a subject area that attracts researchers from both electronic engineering and computer science Whether we are engaged in research into software or hardware seems to be primarily a question of perspective What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research As we prepare for the new millennium the premier European forum for researchers in field programmable logic remains the FPL workshop Next year the FPL series of workshops will celebrate its tenth anniversary The contribution of so many overseas researchers has been a particularly attractive feature of these events giving them a truly international perspective while the informal and convivial atmosphere that pervades the workshops have been their hallmark We look forward to preserving these features in the future while continuing to expand the size and quality of the events
